

Tower STTRFSN

Frost Thermostat

The Tower STTRFSN is a dial-type mechanical frost protection thermostat. With neutral housing to blend in to any style decor

Designed for wall mounting, with 60mm fixing centres for back-box compatibility, and suitable for in-wall or surfacerun wiring connection. The thermostat cover incorporates four breakouts for surface-run conduit. The temperature regulation mechanism is the well-proven sealed bellows system. Install in parallel to the room thermostat in a cool area of the property, to protect the property, heating system and boiler against the risk of damage from frost.

Temperature range	-	-5 ⁰ — 15 ⁰ C
Differential	-	1°C
Contact rating	-	10 (3) Amperes
Contact type	-	Volt-free changeover
System compatibility	- 4	Mains or low-voltage
Suitable for combi boilers	-	Yes
