

RFE - PRICELIST 2020

TOP 10 REASONS TO CHOOSE NOARK

- 1. RELIABILITY**
- 2. FIVE YEAR WARRANTY**
- 3. SIMPLE INSTALLATION**
- 4. FUNCTIONAL DESIGN**
- 5. QUALITY MANUFACTURING**
- 6. UNBEATABLE SUPPORT**
- 7. INDIVIDUAL APPROACH**
- 8. WIDE DISTRIBUTION NETWORK**
- 9. FLEXIBILITY**
- 10. TRUSTED BY CUSTOMERS**

NEW

NOARK

DEFINITION OF RELIABILITY

**RFE are proud to partner with
NOARK Electric Europe Ltd.
A global manufacturer of
low-voltage electrical components.**

**Miniature Circuit
Breakers (MCB's)
AC/DC**

**Residual Current
Devices
(RCD, RCBO's)**

**Moulded Case
Circuit Breakers
(MCCB)**

Contactors

EV Chargers

TOP TEN REASONS TO CHOOSE NOARK ELECTRIC

- 1** RELIABILITY
- 2** FIVE YEAR WARRANTY
- 3** SIMPLE INSTALLATION
- 4** FUNCTIONAL DESIGN
- 5** QUALITY MANUFACTURING
- 6** UNBEATABLE SUPPORT
- 7** INDIVIDUAL APPROACH
- 8** WIDE DISTRIBUTION NETWORK
- 9** FLEXIBILITY
- 10** TRUSTED BY CUSTOMERS

NOARK

DEFINITION OF RELIABILITY

Who we are

NOARK is a premier global manufacturing company with regional headquarters in Europe and North America. The company is part of a group with more than 25 thousand employees. NOARK Electric has invested millions of euro into in-house product development and works with the latest technologies, NOARK provides efficient and reliable solutions for energy and intelligent power distribution in industries such as utility, renewable energy, iron & steel manufacturing, building, HVAC, petrochemicals etc.

Where we're headed

We are committed to strengthening our market position to become a leader in cost effective components through the development of innovative products and continuous improvements. Our goal is to become a Fortune 500 company while demonstrating integrity, trust and honesty.

Quality Product

- Backed by a 5-year warranty*

Exceptional Value

- Reduce the cost of products
- Improve profitability
- Increase margins

Local Support and Local Inventory

- Superb customer service
- Knowledgeable technical support
- Dedicated sales force
- Well-stocked inventory
- European & North American headquarters

See Section 1 in our Catalogue for the complete range of New Products. Pages (9) to (36)

RFE (REG FARRELL ENGINEERING LIMITED)

Unit 19, Oak Road Business Park, Western Ind Est, Dublin12.

ABOUT US

RFE, with almost 40 years' experience in supplying the electrical industrial industry in Ireland have established ourselves as a leading distributor both for technical and innovating products while also providing reliable and efficient technical support. We are always excited to introduce a new company catalogue reinforcing our longstanding relationships with our key suppliers while also presenting some new innovative additions to our range.

Our commitment to our customers is what sets us apart ensuring the continuity of product supply while also providing value for money solutions. We understand the importance of a Quality Management System and are delighted to have been awarded in 2017 the ISO 9001 2015. We are also a level 3 supplier on Achilles Supply-Line.

Our philosophy is to develop deep relationships with our valued customers in both the electrical wholesale and panel manufacturing sectors. We see ourselves as an integral part of their supply chain and we work closely with our principles to ensure this. As members of EMDA we guarantee an adherence to quality products sourced only from efficient and reliable manufacturers.

Together with our traditional electrotechnical products we are constantly exploring new electrical safety products to address the requirements of modern production and industry.

We are leading suppliers of lightning and surge protection devices. We offer risk assessment, design and commissioning services to our customers through our cooperation with leading lightning protection manufacturers nVent (ERICO), Propster GMBH , A. N. Wallis and Surge Protection Devices UK.

We also provide specialist training to our customers in Infrared Thermography, Airtightness training (Blower door) and installation courses on IR viewing ports for electrical inspection. All courses are to the appropriate international standards and can be held both in our inhouse training room or indeed on site for customer specific training.

We hope you find this new information price list interesting and if you need clarification or information on any of our product ranges **please contact our sales team at sales@rfe.ie**

RFE, "ISO 9001:2015" CERTIFIED COMPANY.

In this new edition of our latest catalogue for "2020" we are delighted to add the following range of low-voltage electrical components from NOARK Electric

Also Featuring

RFE (REG FARRELL ENGINEERING LIMITED)

Unit 19, Oak Road Business Park, Western Ind Est, Dublin12.

Tel: 01 - 465 9010 | Fax: 01- 465 9011 | Web: www.rfe.ie | E-mail: sales@rfe.ie

Mr. Ian Checkley, Manager Director & Stephen Fox our Sales Development Manager were delighted to meet with business partner Steven Chow, CEO of EASTRON ELECTRONIC at the Hannover Messe 2019. Eastron Europe is one of the leading high-tech companies of electrical measurement instruments.

EASTRON COMPANY MISSION

To Create Value and Build Relationships with Our Partners”. We strive to help our customer gain commercial advantage by consistently providing competitively-priced, high-quality products together with the best possible technical support. We pride ourselves on focusing not only our customer’s short-term requirements but also on the long-term needs of the marketplace. This drives us to give the best customer service within the industry and targets complete customer satisfaction. **3 year warranty offered on all products.**

With high quality products and advanced technologies of intelligent meters, Eastron has gained an impeccable reputation among clients and partners in more than 50 countries.

Eastron Europe launch a new website showcasing the full range of metering solutions - Available from RFE www.eastroneurope.com
“A professional Energy Metering Solution Provider”

**For information on Eastron multifunction meters
see pages (135-138) in section 7**

SECTION 1 LOW VOLTAGE MODULAR DEVICES **NOARK**	
MCCB's	9-14
AC MCB'S	15-17
DC MCB'S	18-20
RCD'S, RCBO'S	21-22
Contactors & Accessories	23-26
Isolators (Lockable)	27-28, 90
Consumer Units	29-30
Panel Control & Signal Devices	31-33
EV Chargers (C/W B TYPE RCCB)	34-36
SECTION 2 SWITCHGEAR	
Isolators/Switch Fuses/Load Break Switches	37
Dilos/Fulos	37-38
Isolators /Switch Fuses/Changeover Switch's in Metal Enclosure	39-40
Busbar Chambers	41
Lovato Switchgear	42
Fireman Switches / IP 65 Isolator	43
NH Fuses and Fuse Base	44
Neozed Switch Fuses and Fuses	45
Fuses and Fuse Bases Cylindrical	46-47
SECTION 3 ENCLOSURES	
APO (GRP)	48-50
ARIA (GRP)	51-52
Famatel Metal and Plastic	53
Farm Meter Box	53
Polysafe (GRP)	54-55
Emiter (GRP)	56
VMS Modular System	57-60
Pedestals (GRP)	61
RFE Telecom Cabinets (Galvanised Steel)	62
Stainless Steel	63
Sheet Steel Enclosures	64-65
Mini Junction Boxes	66
Enclosures for IT/ Electronic Industry	67-68
SECTION 4 CONSUMER UNITS	
Metal Consumer Units Flush	69
Metal Consumer Units Wall Mounted	69
Equipped Insulated Consumer Units	70
Acqua Surface Enclosures	71
SECTION 5 THERMAL SOLUTIONS FOR ELECTRICAL ENCLOSURES	
Filter Fans	72-75
Heaters	76-78
Thermostats/Hygrostat Fan Speed Controllers	79-83
LED Lamps	84-86
Panel Accessories, Sockets and Din Rail Holders	87
SECTION 6 MODULAR DEVICES	
SPD (Surge Protection Device Including Data Signal Surge)	88
Connecting Busbar	89
Modular Heating Contactors	89
Isolators (Lockable), Modular Changeover Switch, Overcurrent Device	90
Connecting Bus Bar, Earth And Neutral Bars, Wire Bridges	91,114
Connection Terminals For Bus Bar Fork And Pin	92
Time Clocks / Heating Controls	93
SECTION 7 PANEL ACCESSORIES	
Panel Trunking	94
Inspection Windows	95-96
Din Rail G Rail	96
Height Extension Studs/Cable Sleeving/Document Holder/ Grommets	97
Insulators Standoff and Passing	98-101
Cable Terminals (Insulated and Non Insulated Ferrules)	102-107
Lugs, Tinned Copper Standard and Economy	108-110
Butt Connectors and C Connectors	111
Cable Clamps	112
Crimping and Cable Stripping Tools	113
Connecting Bus Bar, Earth and Neutral Bars, Wire Bridges	114
EB Earth and Neutral Busbars	115
Equipotential Earth Bar	116
Connecting Terminals for MCB Busbar	117
Feed-Through Terminals	118-120
Threaded and Punched Busbar/Universal Connecting Bar	121
Flexible Busbar	122-124
Distribution Blocks	125
Universal Terminal Blocks	126
Cable to Cable Power Block	127
Braid, Tinned Copper	128

Braid, Insulated	129-131
Power Shunts	132
Power Supplies	133
Panel Instruments (Analogue/Digital)	134
Eastron Easy Click/Multi Click Panel Multifunction Meters	135-138
Eastron Rogowski Coil Meters	138
Multifunction Meters (KW/HR)	139-141
Multi Meter (with PQA)	141
Earth Leakage Relay with Toroidal CT/ Transducers	142
CT's Current Transformers	143-144
Power Factor	145-148
Capacitors, Motor Run and Motor Start	149
Capacitors 3 Phase Power Factor	150
PFC Regulators	151-152

SECTION 8 INSTALLATION EQUIPMENT

Cable Tray/ Cable Protector	153
Cable Management Systems	154-157
Street Lighting/Lighting Cut Outs/ LED Lamps and Gear Tray	158
Cable Jointing Kits	159
Cold Shrink Tubing	160
Heat Shrink	161-162
Insulated PVC Tapes/Specialised Tapes	163
Canal Roll/Cable Sprays/Lubricant/Resin	164
Wire Splice Connector (Gel)/Gloves, General Purpose/Cut Resistant	164
Cable Glands with Lock Nuts	165
Industrial Plugs and Sockets	166-170
Metal Banding/Strapping and Warning Tapes	171
Cable Pulling/Stocking	172

SECTION 9 SIGNALLING DEVICES/BEACONS SIRENS

Beacons/Sirens	173-177
Sirens	175
Beacons	176
TWS Modular Warning System	177

SECTION 10 CABLE MARKING

STD Tape Dispenser	178
Trasp System	178

SECTION 11 SAFETY EQUIPMENT

Compass Personal Voltage and Current Detector	179
Test Instruments	180-186
Photovoltaic Tester	183
PQA (Power Quality Analyser)/Installation Testers/Clamp Meters	184
Digital Multi Meters/Voltage Pens	185
Process Calibrators	186
Thermometers, IR	186
Light Meters	186
Sound Level Meters	186
Thermal Imaging Cameras And IR (Infrared Training)	187
Insulated Matting/Carpet	188
Insulated Gloves/Platform/Rescue Rods	188
Helmets, Built-In Visors	188
Sub Station Rescue Kits	189
Insulation Rods For Switch Disconnection	190
Short Circuiting And Earthing Systems	191-193
Voltage Detectors	194
PPE (Harnesses/Balaclava & Face Shield Arc Flash)	195
Insulated Tools	196
IR Windows	197
Delta T Monitoring Temperature Alert System	197
E-Sentry Asset Management Tagging System	198
Sonus XT (Ultrasound Device)	198
Loto (Lock Out Tag Out System)	199-227
Voltage Test Stations (VTS)	228
Voltage Indicators	229-230
HSM (Hot Spot Monitor)	231
Arc Flash Relays	232-238
Pull Rope Emergency Stop Switches	239-240
Trapped Key Interlocking Systems	241-247
Machine Guarding	248

SECTION 12 FEP (FACILITY ELECTRICAL PROTECTION)

FEP (Facility Electrical Protection)	249
Surge Protection	250
Inspection Pits/Ground Enhancement Material	251
Lightning Protection	252-253
Earthing/Grounding Equipment	254-272
Exothermic Welding (Cadwelding)	273-274
Lightning Protection and Surge Protection for Wind Turbines	275
FEP and RFE	276
IP Protection Ratings	277-278

NOARK

DEFINITION OF RELIABILITY

Moulded Case Circuit Breakers

- 1.** 5 year warranty
- 2.** Rated current from 16 A up to 1600 A
- 3.** Breaking capacity up to 150 kA
- 4.** 3 and 4-pole versions available
- 5.** Six frame sizes M1 - M6
- 6.** AC and DC MCCBs and Switch disconnectors
- 7.** Wide range of accessories
- 8.** Thermomagnetic release for size M1-M5 and electronic release for size M6

MOULDED CASE CIRCUIT BREAKERS (MCCB's) NOARK

Electronic Moulded Case Circuit Breakers Ex9M6 are intended for applications mainly in power distribution. Advantages of the electronic release is in an accuracy and reliability of the tripping contrary to the thermomagnetic release. Testing according to IEC / EN 60947-2 standards ensures functions and reliability for a wide variety of applications including isolation.

These breakers are offered with breaking capacities from 50 kA up to 100 kA. Rated impulse withstand voltage U_{imp} 8 kV makes it possible to use them even in system with occurrences of transient over voltage waves of high intensity, e.g. in heavy industry. Utilization category B circuit breakers.

- Electronic Moulded Case Circuit Breakers
- Frame Size 6
- Rated Current up to 1600 amp
- 3-4 Pole Versions
- Rated ultimate short circuit breaking capacity I_{cu} up to 100 kA
- Rated voltage 415 / 690 V AC
- Electronic release

MOULDED CASE CIRCUIT BREAKERS Ex9M TM

Moulded Case Circuit Breakers Ex9M TM are intended for applications in power distribution mainly. Testing according to IEC / EN 60947-2 standards ensures functions and reliability for a wide variety of applications including isolation. These breakers are offered with breaking capacities from 36 kA up to extreme 150 kA. Rated impulse withstand voltage U_{imp} 8 kV makes it possible to use them even in system with occurrences of transient overvoltage waves of high intensity, e.g. in heavy industry. Utilization category A circuit breakers.

MOULDED CASE CIRCUIT BREAKERS Ex9M1

- 3 and 4-pole Moulded Case Circuit Breakers
- $I_{cs} = I_{cu} = 36$ kA at 415 V AC
- I_r can be set in steps $(0.8-0.9-1.0) \times I_n$
- I_i fixed as $10 \times I_n$
- Mounting screws, box terminals as well as phase barriers in the scope of delivery

VERSION Ex9M1S up to 125 A, $I_{cu} = 36$ kA

DEFINITION OF RELIABILITY

AC Miniature Circuit Breakers

1. 5 year warranty
2. Rated current from 1 A up to 100 A
3. Tripping characteristics B, C, D
4. Colored toggle in Ex9BH and Ex9B125 line
5. Contacts state indication window
6. Suitable for busbar connections
7. Easy mounting on DIN rail
8. Undermountable and robust construction
9. Reversible line and load connection
10. Wide range of accessories

DEFINITION OF RELIABILITY

DC Miniature Circuit Breakers

1. General purpose Direct Current (DC) Miniature Circuit Breakers

2. Tested according to EN 60947-2

3. Rated operating voltage 250 V DC per pole

4. Rated current up to 63 A

5. Rated short circuit breaking capacity 10 kA

6. 1 to 4 pole versions

7. Tripping characteristics C, K

8. Wide range of accessories

DEFINITION OF RELIABILITY

Contactors and Accessories

- 1.** 5 year warranty
- 2.** Miniature to large sizes
- 3.** Various operational voltage from 24 V
- 4.** AC and DC variants available
- 5.** Rated current up to 500 A
- 6.** Low power consumption
- 7.** Special contactors for capacitance load
- 8.** Different combination of contacts
- 9.** Mounting on DIN rail or panel
- 10.** Wide range of accessories

EX9CS CONTACTORS

Bringing excellent electric parameters in the form of a very compact device. These contactors can be used for both industrial as well as domestic applications. Thermal current and AC-1 load 20 A at 690 V AC allows switching of resistive loads with maximum currents for domestic applications. Thanks to compact dimensions, Ex9CS contactors are the ideal solution for space limited installations. Contactors are offered as 3 and 4-pole versions and as a 4-pole version with main contacts configuration 2 normally open and 2 normally closed (4P/22).

- Standard version of contactor
- Mounting onto device (DIN) rail 35 mm or onto panel
- Front-mounted auxiliary contacts AX42.. as well as side-mounted ones AX43 can be used
- Can be combined with overload relays Ex9R38

CONTACTORS Ex9C, Frame Size 185/300

- Mounting onto panel with screws
- Front-mounted auxiliary contacts AX42.. as well as side-mounted ones AX44.. can be used
- AC and DC control voltage
- Minimized power consumption of coil
- DC coil technology - no humming noise
- Can be combined with overload relays Ex9R185

DEFINITION OF RELIABILITY

Consumer Units

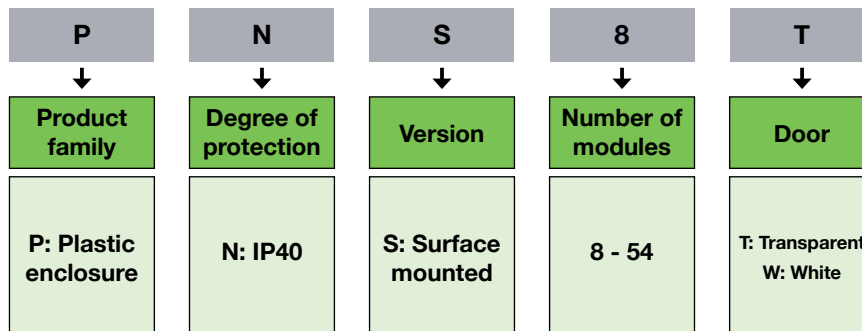

CONSUMER UNITS PNS

Consumer units PNS are intended mainly for domestic applications. Their design is suitable for surface mounting. Scope of delivery consists of enclosure, door, device DIN rails, N + PE terminals, front cover with device cutout, cover for empty place and mounting material.

- Surface-mounted consumer units PNS
- Degree of protection IP40
- 8 up to 54 modules
- 1 up to 4 rows
- Transparent or white door

Code	Description	Price
101497	8 MOD 1 ROW PNS CONSUMER UNIT WITH TRANSPARENT DOOR IP40 H236mm x W215 x D102	€17.10

Residual current circuit breakers B type Ex9LB63 are suitable for domestic as well as industrial applications, where are used frequency inverters, PV plant, EV chargers and similar elements. B type provides sensitivity to residual AC, pulsating and smooth DC current, together with high frequencies up to 1 kHz.

Type 1

Type 2

SWITCHGEAR - Loadbreak Switches

• Isolators • Switchfuses

LOADBREAK SWITCHES

The generation of loadbreak disconnectors DILOS, the fused execution FULOS and the changeover switches meet today's industrial market needs. The concept integrates the requirements of installers and panel builders, fast and easy installation, reliable and durable connections.

Features

- Comprehensive choice of current ratings
- In Dilos from 16A up to 4000A (Loadbreak)
- In Fulos from 125A up to 1000A/1250A (Switchfuse)
- Compact moulded body with transparent cover (visible contacts)
- Universal mechanism
- Clear "ON/OFF" indication
- Double break contacts with separate arcing contacts
- Padlocking in "OFF" – position up to three padlocks
- Very high short-circuit resistance
- Extension shaft with defeat mechanism and positive contact indication

NEW RANGE OF SWITCH DISCONNECTORS

For over 90 years, LOVATO Electric has been designing and manufacturing low voltage electrical devices for industrial applications. Founded in 1922 in Bergamo, Italy, LOVATO Electric is a privately owned company, and has been managed by the same family of entrepreneurs for 4 generations.

LOVATO Electric has a range of over 18,000 products that comply with the strictest requirements of international standards. Motor protection circuit breakers, contactors, pushbuttons, switch disconnectors, limit switches, digital multimeters, energy meters, soft starters, AC motor drives, automatic power factor controllers and engine and generator controllers are just some of the products designed and built by LOVATO Electric.

To find out more call a member of our sales team today at 4659010

STOCKING SOON

GA SERIES 16A TO 160A (AC21A)

- UL60947-4-1 and UL98 certified three-pole switch disconnectors; add-on fourth pole available
- Switch disconnectors with direct operating handle and door coupling version
- Switch disconnectors door mount version
- Switch disconnectors in plastic, metal and AISI 304 stainless-steel enclosure
- Changeover switches in plastic and metal enclosure.

GL SERIES 160A TO 315A (AC21A)

- IEC and UL98 certified three-pole switch disconnectors; add-on fourth pole available
- IEC and UL1008 certified changeover switches
- Switch disconnectors with direct operating handle and door coupling version
- Switch disconnectors in metal enclosure
- Changeover switches in metal enclosure.

GE SERIES 50A TO 1600A (AC21A)

- IEC version three and four-pole switch disconnectors
- IEC version three and four-pole switch disconnectors with NFC, NH and BS type fuse holders
- Switch disconnectors with direct operating handle and door coupling version
- Three and four-pole changeover switches; add-on motorised control unit available.

GM SERIES 30A TO 800A (AC21A)

- UL98 certified three-pole switch disconnectors with CC, J and L type fuse holders
- Direct operating and door coupling versions.

APO - MODULAR POLYESTER BOXES

Range of nine medium sized, modular, multipurpose boxes for indoor and outdoor applications.

Features

- Automation and control applications in oil and steel industry, petrochemical plants, breweries.
- Applications in utilities such as public lighting, traffic control, signalisation.
- For installation in aggressive environments such as shipyards, offshore oil production platforms, mining sites.

All boxes are made of hot moulded, glassfibre reinforced polyester, offering a high protection degree of IP67 with a mechanical impact strength of IK10. APO-boxes can be readily worked with conventional tools such as drills, cutting mills, saws, punches, etc.

ARIA ENCLOSURES

• GRP Glassfibre Reinforced Polyester Enclosures IP66 RAL 7032

ARIA - UNIVERSAL POLYESTER CABINETS

Range of seven universal multipurpose cabinets for both indoor and outdoor applications.

Ideal for high performance applications in:

- Heavy industry (pulp & paper mills, mining sites, wood & lumber production, steel mills)
- Petroleum refineries, chemical and petrochemical plants.
- Temporary connection (for construction yards, camping sites, harbours for pleasure crafts, market places, fairs.
- Food and Drink Industry.
- Waste water treatment, public lighting, traffic control, and signalisation.

POLYSAFE - MULTIPURPOSE POLYESTER CABINETS

Range of fourteen multipurpose, factory assembled cabinets in one depth 320 mm, for indoor and outdoor applications.

All cabinets are made of self-extinguishing, hot moulded, glassfibre reinforced polyester, offering a high protection degree IP65 & IP54 with a mechanical impact strength of IK10 (IP55-IK07 for cabinets with glazed door).

Commercial

- Leisure (market places, camping sites, harbours for pleasure crafts, amusement parks)
- Fuel stations
- Car washes
- Launderettes and laundries
- Service enclosures for construction yards

Utilities

- Waste water treatment
- Waste management
- Telecommunications
- Traffic signalisation
- Traffic control
- Public transport
- Energy distribution (electricity, gas, water)
- Cable television (CATV)
- Public lighting
- Railways

Industrial

- Shipyards
- Mining
- Automotive
- Paper and pulp
- Food and beverage
- Petrochemicals
- Transformers
- System monitoring

Please note: Prices for Glazed Door Enclosures, Depth Extension Frames, Rainhood & Bases can be supplied on Application.

For configurations see diagrams

HYDRA / IP66 (GRP Enclosure)

Used in various applications, in the energy sector, automation, telecommunication industry, and especially in places with a large extent of contamination and also places exposed to flooding (production plants, waste water treatment plants). HYDRA enclosures are made of glassfibre reinforced polyester, they are corrosion resistant against the impact of chemicals and solvents.

IP66 - equipped with 4-point locking system, which includes: tight lock ZIP66, rod and locking elements. The doors of enclosure are equipped with polyurethane gasket. Reversible Door (left/right).

Basic parameters:

- Temperature operating conditions: -50 ÷ 85 °C
- Protection class: II
- Halogen-free material

VMS ENCLOSURES

- VMS Modular Enclosure System • The Ultimate Modular IP65 Enclosure System
- Plus Accessories

VMS - MODULAR ENCLOSURES SYSTEM

Range of five modular boxes based on a 100mm module.

Rapid assembly of any configuration of units without the need for tools. For indoor applications.

- Industry
- Public utilities
- Motor control centres
- Electronic instrumentation
- Low voltage distribution boards

The boxes are made of glassfibre reinforced polycarbonate. Covers are made of either transparent or opaque polycarbonate. VMS boxes provide a high protection degree of IP65 and mechanical impact strength of IK08 for the bases and end-plates and IK10 for the covers.

- The range consists of five boxes based on a 100 mm module.
- The innovative coupling concept allows easy, rapid assembly of any combination of units without the need for tools.
- The open bases offer excellent accessibility and wiring space for installation, mounting and cable connection, even after coupling.
- The side panel openings can be closed by either blind or combi end plates.
- Once mounted, end plates fit perfectly flush with the side panels of the base.
- Each large box is a multiple of a smaller one. Its fixing points in increments of 25 mm in bottom plate and top end are also a multiple of those of a small box.
- The base and end plates are made of light grey (RAL 7035) glassfibre reinforced polycarbonate. The cover is made of either transparent or opaque light grey (RAL 7035) polycarbonate.
- A multiple of accessories like mounting plates, cover plates, depth extension frame, makes the VMS a complete system for electrical distribution and control applications.
- VMS boxes are halogen-free.
- VMS boxes provide optimum security to both operations and equipment because they feature total insulation and protection degree IP65 according to EN/IEC 60529.

ENCLOSURES - Mini Junction Boxes

• Mini Junction Sealed/Boxes In Polycarbonate

CAJA MINI JUNCTION BOXES

Manufactured in shock-proof thermoplastic material, with ultraviolet ray protection and is halogen-free. These boxes with an IP55 degree of protection ensures optimum airtightness in any type of installation. The new cone design allows you to secure the degree of airtightness allowing direct entry of the cable without the use of a rigid tube installation.

ALUMINIUM ENCLOSURES - For Electronic and IT Industry

• Industrial Enclosures - Electronic & IT Industry (Aluminium)

These Aluminium enclosures are IP66 and have exceptionally high stress-resistant qualities. The quality of the aluminium makes these an ideal enclosure line when optimal protection is required. There are 43 different enclosure dimensions and a series of accessories which provides the best possible solutions for a wide range of applications.

EUROMAS-ALUMINIUM

⚠ *These ENCLOSURES can be supplied with DIN RAIL & TERMINALS as required.*

Diecasting Alloy:	Gdaissi 12
Gravity Diecasting Alloy:	Gdaissi 12
Surface, Powder-Coated:	Grey, Similar to RAL 7001
Lid Seal, Foamed:	Neoprene, Polyurethane
Approvals:	Germ. Lloyd Cert. 91 184 HH Lloyd's Register Cert. 96/20063
Versions:	G:=With Clear Lid in Polycarbonate S1:=Lid with Silicone Seal

WALL ENCLOSURE IN SHOCK-RESISTANT POLYSTYRENE. IDEAL FOR USE AS A MEASUREMENT & CONTROL ENCLOSURE, WITH SLOTS FOR PRINTED CIRCUIT BOARD INSERTION.

Features: Large terminal compartment which can be lead-sealed. Novel, robust hinge technology – the hinge side can be changed, the snap lock can also be lead-sealed.

- 100 Version: open, with cover frame
- 100F Version: with closed membrane front
- 1000 Version: with clear lid in polycarbonate

ELECTRONIC & TERMINAL ENCLOSURE IN HIGH-QUALITY ABS

Ingress Protection:	IP 65
Notched Bar Impact Value:	(DIN 53453) 9kJ/m ²
Shape Permanence to Heat:	(DIN 53461) 75 deg C
Flame Resistance:	UL94-HB/3mm
Colour:	Light Grey, Similar to RAL 7035
Features:	Particularly suitable to house electronic component parts Recyclable due to high quality plastics without any metal inserts
Versions:	-F = Lid for membrane Keypad -LP = Base with slot-in PCB facility

BOPLA...

Is a major manufacturer of enclosures for the electronic and it industries. There are over 5000 standard products in the range. Customised solutions are also available.

METAL CONSUMER UNITS - (IP) Flush & Wall Mounted C/Units

FIX-O-RAIL F144 CONSUMER UNIT IP40

Flush Mounted electrical consumer unit, for commercial and residential applications. Due to the discreet design and colour of the masking frame and door, the Fix-o-Rail flush mounting enclosure offers significant aesthetic appeal, particularly in applications where appearance is important, easy to install, easy removable protection plates and generous wiring room.

ACQUA PLUS IP65

The new range of IP65 Acqua Plus surface enclosures consists of four models from 18 to 72 modules with the option of installing a sealable ICP. They stand out for their quick and easy installation in any environment

Code	Description	Dimensions	Price
39018	Famatel 18 MOD 1 ROW IP65 CU	289 x 432 x 160 mm	€60.74
39036	Famatel 36 MOD 2 ROW IP65 CU	464 x 432 x 160 mm	€103.25
39054	Famatel 54 MOD 3 ROW IP65 CU	639 x 432 x 160 mm	€133.62
39072	Famatel 72 MOD 4 ROW IP65 CU	879 x 432 x 160 mm	€197.39

- Range from 18 up to 72 modules.
- Ample space for cabling.
- Detachable module holder and front panel for quick and easy installation.
- Option of installing sealed power control switch.
- Knock-out bi-material membrane that allows easy installation of metric tubes, cables, glands, etc., ensuring an IP65 degree of protection.

Filter Fans - High performance, fast mounting and easy maintenance

Modern design

A positive visual impact is given by the up-to-date design of the grills and the minimal external projection. All molded parts are made of highly resistant and self-extinguishing ABS, UL94 VO grade. The standard color is RAL 7035.

Easy maintenance

Easy maintenance thanks to openable front grill. Replacement of soiled filter mat takes only few seconds and it doesn't require tools.

Wide range of air flow ratings

The range of air flow ratings goes from 26 to 700m³/h

Optimal enclosure protection

The special configuration of the grill, the foam seal gasket and the filter mat ensure an IP54 protection degree towards the enclosure.

Quick electrical connection

ATV are fitted with spring terminals for a faster and safer wiring. Default terminals position is above the fan but it can easily be changed at the bottom of the fan according to wiring needs without tools thanks to Fan Quick Lock system.

Fan Quick Lock (FQL)

Default air flow direction is from the outside towards the inside of the enclosure. If needed the user can easily reverse the direction thanks to Fan Quick Lock system, without tools.

Fast installation

Installation is fast thanks to the simple square cutout on the enclosure and to the snap-in fixing system. No screws are needed.

FAN QUICK LOCK (FQL)

Reverse Air Flow

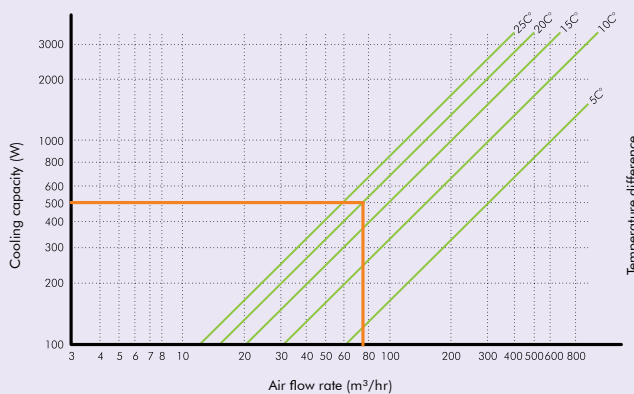

Terminal top/bottom inversion

EASY MAINTENANCE Fast filter mat replacement (FMR)

Anticondensation Heaters

Application

Enclosure heaters are often necessary to prevent failures or corrosion caused by low temperatures or high humidity inside the enclosure. Such conditions are likely to occur when ambient temperature is low and the equipment inside the enclosure is not powered or fails to dissipate enough heat to keep enclosure temperature above the minimum threshold. Outdoor enclosures, for instance, are almost always in such conditions.

Safety

According to the type of heater, surface temperature is limited either by a PTC or by an over temperature safety switch. This allows a safe operation and a self-adjusted heating power. All heaters are in Class II, except FSHT, FPH, FMHT and FMHTS series in Class I.

Wide range of solutions

Alfa electric offers a wide range of solutions, all for DiN rail mounting:

- SHT – PTC heaters with connection on terminals, 25-150W
- SHT/W – PTC heaters with wire connection, 15-50W
- HT – PTC heaters with connection on terminals, 25-150W
- STHT – PTC heaters with connection on terminals, 25-150W
- FSHT – Resistor heaters, fan assisted, 250-750W
- TMX – PTC heaters, fan assisted, 150-400W
- FPH – PTC fan heaters, 1200-2000W
- MHT – PTC mini heaters, 5-30W
- FMHT – Resistor heaters, fan assisted, 75-300W
- FMHTS – Resistor heaters, fan assisted 100-300W

Fast installation

Installation is fast and simple. All units are designed for fast mounting on 35mm DiN eN 50022 rail.

FPH2000.01	Fan Heater PTC 2000 W -230 V w/bimetal thermostat	95 x 160 x 120 mm	€313.35
FPH2000.02	Fan Heater PTC 2000 W -230 V w/electronic control	95 x 160 x 120 mm	€347.30

THERMOSTATS

Compact Thermostat for DIN 35 mm. rail mounting. Based on bimetallic junction, provides high capacity NO or NC contact. Two versions available.

THVx	NO Contact	●	Typically used for controlling ventilation devices
THRx	NC Contact	●	Typically used for controlling heaters

THRF - THVF

BIMETALLIC THERMOSTAT FIXED SET

Fixed set point compact thermostat for DIN 35 mm. rail mounting. Based on bimetallic junction, provides high capacity NO or NC contact. Two versions available.

THRV - THVV

DOUBLE-THERMOSTATS

Compact double thermostat for DIN 35 mm. rail mounting. Based on bimetallic junction, provide high capacity and separated NO and NC contacts in different combinations. Three versions available.

THRV13	NC	●	NO	●
THRV22	NC	●	NO	●
THVV22	NO	●	NO	●

THS

THERMOSTAT CHANGE-OVER CONTACT WITH LOW HYSTERESIS

4-pole terminal for 2.5 mm² wire
Protection degree EN60529 IP20

EUH

HYGROSTAT

Electronic Hygrostat for DIN 35 mm. rail mounting.
Typically used to control enclosure heaters.
LED display of power on and status.

ETUH

THERMO-HYGROSTAT

Electronic Hygrothermostat for DIN 35 mm. rail mounting.
Typically used to control enclosure heaters. The change
over contact triggers either for high humidity or low tem-
perature, independently set adjustable. LED display of
power on and status.

ETHM - ETHDM

TEMPERATURE CONTROLLERS

Compact Size - 1 DIN Module (17,5mm) or 2 DIN modules (35mm)
 Supply 20-30 VAC/DC or 200-240 VAC
 Din rail mounting
 Analog temperature adjustment
 Suitable for temperature control inside electric panel
 (Fan control and resistor control)
 One or two independent NTC probe inputs
 1 relay output x 8A (ETHM10,ETHM14),
 2 relay outputs x 16A (ETHDM10, ETHDM14)

FSC

FAN SPEED CONTROLLER

Electronic temperature-regulated fan speed controller for DIN 35 mm. rail mounting.
 Speed controller helps to reduce fan noise, air flow rate is reduced to the optimum speed required.

FS

FLASHING SAFETY DEVICE

The flashing safety devices series FS prevents accidents, alerting the operator that the electrical system is live. The FS devices are suitable for connection to three or single-phase lines. FS is also a phase-loss and phase-sequence control device: in case of failure, it points out the missing phase. The device functions can be increased with auxiliary contacts that allow to switch-on the lamp when opening the cabinet door or to control other equipment inside the cabinet (air conditioner, etc.)

LEDLAMP 32

SLIM, HIGH EFFICIENCY ENCLOSURE LED LAMP WITH MOTION SENSOR

Wide voltage range from 20VDC up to 265VAC in a single model.

Spring terminal. More units can be connected together in a chain.

Fixing clips in each model permit to rotate the lamp according to lighting needs.

Magnet fixing or screw fixing. Motion sensor or switch ON/OFF available.

SPRING TERMINAL

MOTION SENSOR

CLIP FIXING WITH MAGNET OR SCREW

ORIENTABLE

LAMP CP22

COMPACT, HIGH EFFICIENCY ENCLOSURE LAMP

Fitted with Schuko socket and switch, it can be mounted with clips on DIN rail, on a bracket (ALFASTAFF) with screws or with magnetic fixing. It fits exactly one 19" height/unit (44 mm).

LED LAMP CP22

COMPACT, HIGH EFFICIENCY ENCLOSURE LED LAMP WITH MOTION SENSOR

Fitted with Schuko socket and switch, it can be mounted with clips on DIN rail, on a bracket (ALFASTAFF) with screws or with magnetic fixing. It fits exactly one 19" height/unit (44 mm). Models LED LAMP CP22S and LED LAMP SP22S are fitted with motion sensor.

LL4

SLIM ENCLOSURE LED LAMP

Slim and versatile led lamp. More units can be connected together in a chain up to a total power of 100W, by using the addition interconnection cable including in the packaging.

LAMP 36

SLIM ENCLOSURE LAMP

Slim and versatile fluorescent lamp. More units can be connected together in a chain up to a total power of 100W, by using the addition interconnection cable including in the packaging.

LAMP 3012

ENCLOSURE LAMP

LAMP 2005

Slim and versatile fluorescent lamp. More units can be connected together in a chain up to a total power of 100W, by using the addition interconnection cable including in the packaging.

12901/100	Shroud for 160A	€3.41

Universal Connecting Bar CB 7 x 16²-450A

High-conductivity brass material, the connecting bar is quick and easy to install, requiring only two M5 to M10 screws with a pitch from 18 mm to 25 mm. The hexagonal key helps simplify wiring, and the convenient design allows visual inspection of the wire and confirmation of the connection. The high fill ratio allows an output connection with or without a terminal. The connecting bar is a 450A power distribution bar that is designed to be connected to threaded or perforated copper or tinned aluminium busbar. This compact system is only 68mm long and allows for the connection of up to seven 1.5 to 16mm² output cables.

INSPECTION WINDOWS

A practical, waterproof system for the operation and protection (mechanical) of MCB's, RCD's and modular apparatus. In both flat and raised versions, there is a sealing device, as well as with or without a rust proof spring, to prevent the cover of the inspection window remaining open, especially when this is installed outdoors. Because of their great ease of assembly, they can be used in metal enclosures, without the possibility of electrical contact, internal-external.

RAISED INSPECTION WINDOW IP65 WITHOUT SPRING

Code	Dimensions	Price
2ma	50x59	€11.49
4ma	50x94	€14.49

GROMMETS

These grommets are made in plastic PVC, colour RAL 7035 which are self extinguishing, dust proof and watertight and offer an economic and simple solution to the problem of fitting cable entries and plain tubing through insulating casing. Can be cut to the Ø of the cable or plain tube, covering all the possibilities from 6/87mm.

ELECTRICAL EARTH BAR - SINGLE DISCONNECT LINKS

Features

- Provides a convenient, single-point grounding and bonding location
- Busbars with disconnect links allow for convenient testing of the earth termination system
- High conductivity, hard drawn, electrolytic tough pitch copper per EN 13601
- Includes halogen-free polyamide insulators, stainless steel (EN 1.4401) hardware and mounting brackets
- Custom bars can be designed and manufactured to customer specifications

ELECTRICAL EARTH BAR - DOUBLE DISCONNECT LINKS

Features

- Provides a convenient, single-point grounding and bonding location
- Busbars with disconnect links allow for convenient testing of the earth termination system
- High conductivity, hard drawn, electrolytic tough pitch copper per EN 13601
- Includes halogen-free polyamide insulators, stainless steel (EN 1.4401) hardware and mounting brackets
- Custom bars can be designed and manufactured to customer specifications

EQUIPOTENTIAL EARTH BAR EEB SERIES

ⓘ Size of copper bar: 50mm width x 5 mm thickness. Base (mounting): Galvanised steel profile, width 100mm. Halogen free polyamide insulators. Delivered with nuts, bolts and washers (size M10, spaced 50mm) installed on terminals location.

Universal Connecting Bar CB 7 x 16²-450A

High-conductivity brass material, the connecting bar is quick and easy to install, requiring only two M5 to M10 screws with a pitch from 18 mm to 25 mm. The hexagonal key helps simplify wiring, and the convenient design allows visual inspection of the wire and confirmation of the connection. The high fill ratio allows an output connection with or without a terminal. The connecting bar is a 450A power distribution bar that is designed to be connected to threaded or perforated copper or tinned aluminium busbar. This compact system is only 68mm long and allows for the connection of up to seven 1.5 to 16mm² output cables.

€13.83 Code: 553150

FLEXIBAR

Offers advantages over solid bars or cables and lugs in most applications. It has several advantages, which include space saving, copper saving, time saving and safety.

SPACE SAVING

The adjacent illustration gives an indication of the potential savings in space (and copper) by using Flexibar thanks to its very small radius of curvature.

Cable HO7 V-K -120mm² - 320mm Long

COPPER SAVING

For the same working temperature, Flexibar can carry a higher current than an equivalent cable. Hence a smaller cross section of conductor can be used, thus using less copper.

TIME SAVING

The simplicity of removal of insulation, the extreme flexibility of Flexibar (even the large cross sections) and the elimination of lugs and crimping tools offer tremendous time savings during installation; particularly if the Eriflex punching tool is used.

SAFETY

By reducing the number of connections, which are the weak points in any electrical circuit, Flexibar offers;

- Better behaviour under short circuit conditions, better electrical efficiency.
- Less potential "Hot Spots"
- Less exposed "Live Parts"

ADMISSIBLE CURRENTS

Internal Temperature (T1)
(T2) Temperature of Conductors

This table indicates the temperature rise produced by chosen circuit in the given section. This calculation does not take into account the heat dissipation from the switchgear. **SELECTION OF FLEXIBAR ACCORDING TO THE INTERNAL TEMPERATURE OF THE PANEL.**

$$\text{Temperature rise of conductor} = T2 - T1 = \Delta T \text{ (K) With } T2 \text{ max} + 105^\circ$$

1. Bars of Same Phase - doubled up to increase rating - bars in contact
DE-RATING ON FLEXIBARS 1. Bars of Same Phase - doubled up to increase rating - bars in contact.

2. AC Three Phase System All phases touching or bound together de-rating factor 0.7.

Example to the left
6 x 32 flexibar would be de-rated to
0.7 x 700 = 490 Amps (for all 3 bars)

Current Rating = Current Rating for 1 bar x 1.7 x 0.9 Example 6 x 32 Flexibar 'Green' rating of 700 Amps. Doubling up this bar as shown above would give total rating of 700 x 1.7 x 0.9 = 1071 Amps

If bars are on edge you do not require the 0.9 so rating of above is 700 x 1.7 = 1190 Amps

FLEXIBLE BUSBAR 2M LENGTHS

① For sizing please refer to technical note on previous page.

ETB TERMINAL BLOCKS

have a large range of connectors (2,5 ÷ 240 mm²) with possible inputs 2, 4, 6. Terminal block with rated cross section 50 mm², we also offer in a 3-pole design. The terminals are composed of an electro-conductive part and insulating cover. Connections can be made with aluminum and copper conductors. Insulating properties ensure the cover made of polyamide (PA).

POWER BLOCK SB SERIES

COMPACT POWER BLOCKS WITH
SHORT-CIRCUIT CURRENT RATING

- Complete Power Blocks range, from 80A up to 630A IEC® – 85A up to 545A UL®
- Offer multiple connection possibilities with One cable, Two cables or ERICO® FLEXIBAR® and IBSB/IBSBR Power Braid
- Large cross section aluminum/ copper conductor connection
- Offer time saving and reliability
- High current short circuit resistance
 - 100kA SCCR (UL)
 - Ipk up to 51 kA (IEC)
- High voltage values under IEC & UL certification (minimum of 1000V AC/DC)

IBSHY INSULATED BRAIDED CONDUCTOR FOR COMPACT CIRCUIT BREAKERS

Suitable for all main 125/160 A electrical devices and specifically molded case circuit breakers

- Resistant to vibration, improving reliability and performance
- Improves assembly flexibility and aesthetics
- Quick and easy installation
- No additional cutting, stripping, crimping and punching needed
- Small wire diameter provides maximum flexibility
- Halogen free solution for applications requiring a low smoke solution
- Conforms to NF EN 45545 obtaining an HL2 classification for chapters R22 and R23
- High working temperature
- ROHS Compliant

GROUNDING AND BONDING BRAID, TINNED COPPER WITH HALOGEN FREE & FLAME RETARDANT YELLOW GREEN INSULATION

MBJYG Grounding and Bonding Braids are a reliable and convenient ground solution for applications that require flexibility and durability. Designed with halogen-free and flame retardant Yellow Green insulation, MBJYG braids are made with tinned copper ground braids and solid palms that are ready to install without any additional cutting, stripping, crimping or punching.

MBJYG braids also do not require the addition of tin or crimped lugs and the proprietary manufacturing process helps optimize the electrical contact between each wire and helps eliminate moisture issues in the palms, helping prevent corrosion and extend the useful life of the braid.

Tinned copper Integral palm,
without crimped lugs for superior electrical contact and tensile strength resistance

Complete range of earth/ground flexible connections from 6 - 25 mm² (11.84 - 49.33 kcmil) cross section and from 100 - 300 mm (3.937" - 11.811") length

Working Temperature:
-55 to 125 °C

Ready to use out of the box, eliminating the need for cutting, stripping, crimping and punching

Provides **weight and material savings** with lower impedance when compared to similar lugged cables with insulation (Recommended by the EMC/EMI directives)

Halogen free and Flame retardant yellow green insulation

UL 467 listed and IEC 61439-1 certified

Resistant to vibration and fatigue, reducing maintenance

PANEL ACCESSORIES - Insulated Braids

Material: Copper; Polyolefin

Finish: Tinned

Dielectric Strength: 15 kV/mm

Flammability Rating: UL® 224 VW-1

Halogen Free Rating: EN 14582

Nominal Voltage, UL/CSA/IEC: 600 V

Working Temperature: -55 to 125 °C

Complies With: IEC® 60439.1; IEC® 61439.1

Certifications: CE; cULus; RoHS

- Undrilled palms to customer's specific designs, fitted by power press
- Extra-flexible power connections (expansion rings, busbar...)
- Tinned electrolytic copper strand \varnothing 0.15mm
- When used in parallel, the 2 shunts must be spaced with a minimum distance equal to the thickness of the shunt to allow air cooling.

COMPACT MODULAR POWER SUPPLIES

Power supplies are used in virtually all industrial control systems and we have a convenient solution for these applications. The compact design of our primary switched power supply makes them ideal for control of output voltages and current ranges. Units are fully enclosed and designed for rapid installation, both mechanically via din rail mounting, and electrically by connections to removable terminals.

In order to ensure overall system reliability, these power supplies are available with built-in features to ease connection in redundant supply schemes. Versions of the power supplies are available with integral paralleling diodes and failure alarms. All power supplies are designed and 100% tested to ensure reliable operation.

EASYCLICK - SMART X96-1

FOR PRICES SEE PAGE 137

A carefully designed new concept that reduces installation time of traditionally wired power meters and current transformers. The “Easy Click” system also reduces the risk of wiring errors and offers higher accuracy due to the class 0.5 Current Transformers and class 0.5 Power Meter. This is the only Plug & Play metering system that offers an overall Class 1 accuracy.

We have utilized low powered secondary outputs on our range of Current Transformers which allows the use of RJ12 connections between Current Transformers and Power Meters. The Power Meters also have a voltage output which allows you to connect up to 32 Meters from one common fused supply. “Easy Click” has been tested and MID certified.

Meters with Multi Circuit capabilities

3 year warranty offered on all products.

Eastron Europe launch a new website showcasing the full range of metering solutions - Available from RFE www.eastroneurope.com
 “A professional Energy Metering Solution Provider”

Multi Click Solution-MCS-D40/50/60 Display & Control Module

FOR PRICES SEE PAGE 137

(MODULAR DESIGN - IDEAL FOR RETROFIT APPLICATIONS)

- Provides centralised data of the MCS-I (current) and MCS-U (voltage) modules
- Works as a data concentrator with 1G memory
- Equipped with an Ethernet port, MCS-D50/60 work as a gateway
- It is the control module to set parameters on MCS-I and MCS-U modules

Multi-Click is an intelligent measuring and monitoring solution for power management and distribution. It has been designed and engineered to accommodate new and existing installations. This solution offers centralized measurement data on one display. As the current (A) measurement device (MSC-I) is a 1 module DIN rail mounted enclosure, it reduces the space typically used in a traditional board or panel. The system uses pluggable input and output RJ45 connectors which enables flexibility as well as speed of installation, reducing the labour cost dramatically.

It is a modular based system which allows up to 32 x 3 phase current circuits and 96 x 1 phase current circuits to be measured and monitored. The entire system shares one voltage reference and one common display module. No auxiliary power supply is required.

3 year warranty offered on all products.

NEMO 96HDLE NETWORK MONITOR FOR LOW VOLTAGE

Price: €185.12

- 3-phase line 80...500V (phase-phase)
- Connection on dedicated CT
- Programmable external CT and VT ratio
- Active energy class 0,5
- Pulse output
- RS485 communication
- Phase sequence correction, diagnostic
- 96x96mm

Expansion modules & accessories are available to complete additional functionalities & features for the NEMO96HD/HDLe

**For Technical support please contact a member of our sales team,
they will be happy to answer any questions you have.**

**We stock a comprehensive range of Multi-Function Meters
Solutions for electrical measurement, industrial automation & energy management.**

NEMO D4E MULTIFUNCTION METER FOR LOW-VOLTAGE NETWORKS, 4 MODULE

The simple solution for DIN rail measurement

To meet the new requirements for electrical measuring the new Nemo D4e multifunctional is the simple solution for DIN rail measurement. Backlit display with 4-line is one of the characteristics of this new meter. Pulse output as standard, on-board RS485 communication complete the instrument's features

- Multifunction
- Display 4 lines
- Pulse output S0
- RS485 Communication

Technical Specifications

Line Type:	Three Phase 50Hz...460V (phase-phase) Single Phase 50Hz...290V
Input:	From /5A CT Direct Voltage 460V Nominal Frequency 50 Hz
Aux supply:	Alternate Current: 230 V
Precision Class:	Active Energy Precision (EN/IEC 61557-12): class 1 Reactive Energy Precision (EN/IEC 61557-12): class 1
Output:	Pulse S0 RS485 with protocol: Modbus

Price: €171.60

CONTO D6 ENERGY METER FOR LOW TENSION, 6 MODULE DIRECT 125A

Energy Meter for low tension, 6 module

- Energy meter 125A direct
- Multi-Measurement
- 3 rows display
- 2 tariff
- Pulse output S0 programmable
- RS485 communication

Technical Specifications

Line Type:	Three-phase with neutral
Input:	Direct 125A Direct 3x230/400 +-15% Rated Frequency 50 Hz
Aux supply:	Self powered
Precision class:	Active Energy (EN/IEC 62053-21): class 1 Reactive Energy (EN/IEC 62053-23): class 2
Output:	Pulse S0 RS485 with protocol: Modbus

Price €305.76

PANEL ACCESSORIES - Multifunction Meters

• Nemo 96 EA (PQA) • Nemo SX Plus Software

NEMO 96 EA (NETWORK ANALYSER)

POWER QUALITY ANALYSER

for low and medium voltage networks,
96x96mm

- Multifunction
- 4 lines display
- Harmonics up to the 40th order
- Pulse output S0
- RS485 communication
- Surge
- Network holes
- Network interruptions
- Rapid variations of tensions
- Instability
- Built-in memory (8Mb)
- RTC (Real time clock)
- Expansion modules

The continuous evolution of the electricity grid monitoring systems has consequently changed the market demand for measuring instruments. To meet the new requirements for the measurement of electrical measurements, the multifunction Nemo 96 EA, 96x96 recessed solution for network quality control. Large backlit display with 4-line display, overvoltage, mains holes, network interruptions, rapid variations in voltage and instability are some of the features of the new meter. RS485 communication* and the possibility to add further modules complete the equipment's features. *through the IF96001 communication module supplied.

NEMO SX

NEMO SX is an autonomous and integrated system, thanks to the type of automatic connection the Nemo SX simplifies the assembly phases and does not require modifications in the existing panels. Its mechanical characteristics allow it to be used with a wide range of protection devices and in all distribution panels and cabinets with DIN35 profiles.

The supervision of the system is ultimately achieved by using any device PC, tablet or smartphone, using the software installed or the internet browser.

MIDAs Evo

Multi Instrument Data Acquisition Software

MIDAS Evo is the solution for those looking for a complete system for energy monitoring of the systems where there are installed Nemo models. The system is fully configurable, in fact, you can view in real time all the measurements read by the instruments, perform historical reporting of daily, monthly and annual rates preset by the user and alerts you by email to be always at the correct operating current of own plant

- Reports & Graphs
- Schedule and Tariff levels
- Software and alarms via email
- Web Service Server

Measurement class

Classes 0.5/1 recommended for measuring power electricity and $\cos\phi$
Class 3 to be used for current measures on ammeters only.

Performance (VA)

This represents the maximum load that can be connected to the secondary terminals of the CT.

The load consists of the self consumption of the measurement instrument + adsorption of the cables connecting the CT and the instrument. This latter depends on the length and cross-section of the cable. For the functioning of a certain measurements class, the maximum load must always be lower or equal to the performance / rated class of the CT.

The following is a table for calculating the absorption of the cables connecting the CT and the instrument

Power absorbed (VA) by the cables connecting the CT and the instrument		
cross section mm ² copper	*VA per meter of bipolar cable at 20°C	
	secondary 5A	secondary 1A
1	1	0.04
1.5	0.685	0.0274
2.5	0.41	0.0164
4	0.254	0.0102
6	0.169	0.0068
10	0.0975	0.0039
16	0.062	0.0025

* The VA absorbed by the connection cables rises 4% for every 10% variation in the temperature.

CT/5A or CT/1A?

From the table shown above, it can be seen that using the same cross section the CT/1A absorbs 25 times less than the CT/5A because of the very long sections ($\geq 20m$). You are advised to choose a CT/1A so as to reduce the section and relative cost of the cables as well as ensuring more precise reading.

ITALFARAD LOW VOLTAGE POWER FACTOR CORRECTION UNITS

Industrial plants with inductive loads that vary greatly throughout normal everyday operation will require automatic P.F. equipment in order to connect the necessary capacitive power to correct the issue of "Power Factor".

WHY SHOULD POWER FACTOR BE IMPROVED?

Reduced utility charges

Thermal capacity considerations force the Utilities to overbuild its distribution system in order to serve a facility with low power factor. The Utilities require the customer to install capacitors for reducing the reactive energy.

Increased system capacity

The thermal capacity of generators, transformers and cables limit the kVA that can be supplied by the system. Reducing the KVAR demand from existing load by installing capacitors, allows additional load to be added to the system.

Improved voltage

High demand of reactive power increases the voltage drops across transformers, cables and other system components. The result is a decreased nominal voltage. The voltage drops can be limited by increasing the power factor.

Reduced losses

Since current is reduced in direct proportion to the increase in power factor, the resistive losses, in the circuit, are inversely proportional to the power factor. The increase of power factor allows a losses reduction with substantial benefits for the system.

SELECT YOUR SOLUTION

Standard PFC equipment (XS Series)

Suitable equipment for installations with low harmonic pollution and without risk of harmonic resonance.

Detuned PFC equipment (A Series)

Suitable equipment for all the installations, even with high harmonic pollution.

**Send us your Utility Bills and we will calculate what
Power Factor Correction equipment is required**

REGULATORS

The PFCevo automatic power factor control unit has been designed to offer state-of-the-art functions for power factor compensation applications. Built with dedicated components and extremely compact, the PFCevo combines the modern design of the front panel with practical installation and the possibility of expansion from the rear, where one expansion module can be slotted. The LCD screen provides a clear and intuitive interface to the user.

- Automatic power factor controller.
- Flush-mount, standard 96x96mm housing.
- Backlit LCD screen.
- 5 relays, expandable to 7 max.
- 4 navigation keys for function and settings.
- Alarm messages in 6 languages.
- Expansion bus modules:RS485, USB communications interface. Additional relay outputs.
- High accuracy TRMS measurements.
- Wide selection of electrical measures, including voltage and current THD with harmonic analysis up to 15th order.
- Voltage input separated from power supply, suitable for VT connection in medium voltage applications.
- Wide-range power supply (100-440VAC).
- Front optical programming interface: galvanically isolated, high speed, waterproof, USB dongle compatible.
- 2-level password protection for settings.
- Backup copy of original commissioning settings.
- Built-in temperature sensor.

RENTAL SCHEME: Power Quality Analyzer

For measuring and recording Mains Parameters in Compliance with EN50160

The **PQA824** provides a solution, with an innovative approach to meet the needs of professional technical departments and testers as regards measuring and recording generic single-phase and three-phase electric mains parameters, further to solving typical problems of the industrial sector (mains quality, power supply switching, PC network faults, non-linear circuit analysis, system correction, motor starting, etc.). Models are provided with a wide TFT graphic color display (320x240 pxl) with "touch screen". The user interface has identification icons which provide a simple and intuitive selection method of internal parameters. Each instrument allows displaying the parameters in multiple numeric and graphic modes for an easy harmonic analysis. The graphic function "Vector diagram" also allows immediately evaluating the reciprocal phase displacement between the input voltage and current signals, thus defining the nature of loads. The high-capacity internal memory of each model, approx. 15Mbytes, allows saving the data of all recordings for a high number of consecutive days (approx. 1 month with 251 quantities selected and integration period of 15 minutes), but the memory of each instrument is extensible, at all times, by inserting external Compact Flash memories and also by transferring data onto USB memory sticks for a practical management of the saved data.

WHY SHOULD POWER FACTOR BE IMPROVED

REDUCED UTILITY CHARGES

Thermal capacity considerations force the Utilities to overbuild its distribution system in order to serve a facility with low power factor. The Utilities force the customer to install capacitors for reducing the reactive energy.

INCREASED SYSTEM CAPACITY

The thermal capacity of generators, transformers and cables limit the kVA that can be supplied by the system. Reducing the KVAR demand from existing load by installing capacitors, allows additional load to be added to the system.

IMPROVED VOLTAGE

High demand of reactive power increases the voltage drops across transformers, cables and other system components. The result is a decreased utilization voltage. The voltage drops can be limited by increasing the power factor.

REDUCED LOSSES

Since current is reduced in direct proportion to the increase in power factor, the resistive losses, in the circuit, are inversely proportional to the power factor. The increase of power factor allows a losses reduction with substantial benefits for the system.

TO DISCUSS YOUR REQUIREMENTS PLEASE CONTACT AN EXPERIENCED MEMBER OF SALES TEAM TODAY.

POWERFACTOR CORRECTION ELECTRONIC REGULATOR

Code	Description	Price
PFC96EVO	5 steps expandable up-to 7 PF Regulator	€180.80
PFC144EVO	8 steps expandable to 10/12 PF Regulator (see next page)	€310.65

PFC96EVO

The PFCevo automatic power factor control unit has been designed to offer state-of-the-art functions for power factor compensation applications. Built with dedicated components and extremely compact, the PFCevo combines the modern design of the front panel with practical installation and the possibility of expansion from the rear, where one expansion module can be slotted. The LCD screen provides a clear and intuitive interface to the user.

- Automatic power factor controller.
- Flush-mount, standard 96x96mm housing.
- Backlit LCD screen.
- 5 relays, expandable to 7 max.
- 4 navigation keys for function and settings.
- Alarm messages in 6 languages.
- Expansion bus modules:RS485, USB communications interface. Additional relay outputs.
- High accuracy TRMS measurements.
- Wide selection of electrical measures, including voltage and current THD with harmonic analysis up to 15th order.
- Voltage input separated from power supply, suitable for VT connection in medium voltage applications.
- Wide-range power supply (100-440VAC).
- Front optical programming interface: galvanically isolated, high speed, waterproof, USB dongle compatible.
- 2-level password protection for settings.
- Backup copy of original commissioning settings.
- Built-in temperature sensor.

PFC96EVO - TECHNICAL CHARACTERISTICS

Supply	Relay output: out 5
Rated voltage: 100÷440 Vac 45÷66 Hz – 110÷250 Vdc	Contact type: 1 changeover
Power consumption/dissipation: -2,5 W – 7,0 VA – 110÷250 Vdc	Rated current: AC1-5A 250Vac AC15-1,5A 440Vac (only NO)
Immunity time for microbreakings: <25 mS	Insulation voltage
Voltage inputs	Rated insulation voltage: 600 Vac
Maximum rated voltage: 600 Vac – 45÷66 Hz 110÷250 Vdc	Rated impulse withstand voltage Uimp: 9,5 KV (only NO)
Measuring method: TRMS	Ambient operating conditions
Wiring mode: Single-phase, two-phase, three-phase with or without neutral or balanced three-phase system	Operating temperature: -20°C +60°C
Current inputs	Storage temperature: -30°C +80°C
Rated current: 1A or 5A	Connections
Measuring method: True RMS	Terminal type: Plug-in / removable
Overload capacity: +20% Ie	Cable cross section (min...max): 0,2...2,5 mm2 (24÷12 AWG)
Power consumption: <0,6VA	Case
Relay output: out 1-4	Version: Flush mount
Contact type: 4x1 NO + common contact	Material: Polycarbonate
Rated current: AC1-5A 250 Vac AC15-1,5A 440 Vac	Protection degree: IP54 on front – IP20 terminals
Maximum current at contact common: 10A	Peso: 350 g
	Certifications
	Standards: IEC/EN 61010-1, IEC/EN 61000-6-2 IEC/EN 61000-6-4 UL508 e CSA C22.2-N

CABLE TRAY

PVC Cable Trays for large cable installations in industrial facilities, hospitals, airports, shopping centres, households etc. Very high resistance to most commonly used chemical and aggressive agents and virtually maintenance free. Cut and damaged edges do not corrode in adverse atmospheric conditions.

PERFORATED CABLE TRAYS (Standard Length 3m)

Code	Dimensions W x H	Price/M
Q45502	100 x 50	€10.35
Q45503	150 x 50	€13.02
Q45702	100 x 75	€11.79
Q45703	150 x 75	€15.30
Q45504	200 x 50	€15.81
Q45505	300 x 50	€24.34
Q45104	200 x 100	€27.14
Q45105	300 x 100	€35.85

TRUNKING (2 Mtr Lengths)

Code	A	B	Price/M
SC 12-50	12	50	€6.33
SC 18-75	18	75	€10.82
SC 20-92	20	92	€16.04

COVERS (Standard Length 3m)

Code	Dimensions W	Price/M
Q45002	100	€6.81
Q45003	150	€9.13
Q45004	200	€11.70

CABLE ENTRY SYSTEMS & CABLE GLANDS FOR PRE-TERMINATED CABLES

The patented cable entry systems enables the user to enter, seal and provide strain relief for pre-terminated and standard cables. The split system of the metric cable glands KVT and QVT enables a tool-free, quick and easy assembly which is great for retrofitting and maintenance.

The key feature of icotek's patented systems is the split frame and split grommets which provide quick, convenient and cost effective routing of pre-terminated and standard cables. The split frame and split grommets alleviate the need to cut and rewire pre-terminated cables. Therefore, cable warranties are unaffected. Cables, pipes and conduits with various diameters can be routed due to large variety of split grommets. When assembled correctly, the split grommets are held tightly within the frame. Correctly sizing the grommet to the cable diameter ensures a high degree of protection (up to IP65 / NEMA 4X) and provides strain relief.

Advantages

- Certified protection class up to IP65 / NEMA 4X
- Warranty of pre-terminated cables remains
- Quick and easy assembly
- Retrofitting and maintenance can be carried out easily and quickly
- High packing density, wide variety
- Suitable for industrial standard and metric cut-outs
- Strain relief according to EN 62444
- Vibration proof

up to
IP65

Split grommets

CABLE ENTRY PLATES FOR CABLES WITHOUT CONNECTORS

With the membrane based cable entry plates standard cables with diameters from 1.5 to 22 mm can be quickly routed into control cabinets, panels or machines and be sealed with protection class up to IP68 / NEMA 4X. In comparison to traditional solutions such as standard cable glands the packing density is greatly increased. This combined with a reduction of required space make the icotek solution a great choice.

For routing supply lines with diameters of up to 115 mm icotek offers innovative pyramid shaped cable entry grommets which are perfectly flexible for feeding rigid supply cables at angles with very little effort.

Advantages

- Space saving shape
- Certified protection class up to IP68 / NEMA 4X Rugged design
- Very high strain relief
- High packing density
- Assembly within seconds
- Suitable for standard and metric cut-outs
- Hygienic design - flat and smooth surface
- Halogen free, silicone free

up to
IP68

Membrane on front

Conical shape on back provides additional sealing and strain relief

STRAIN RELIEF & CABLE MANAGEMENT

Whenever cables, wires, hoses or conduits with diameters up to 20 mm have to be fixed, routed or strain relieved the icotek strain relief plates are used. With just one component you can route and strain relieve up to 12 of these lines, in static or dynamic applications.

Fixation of the cables is achieved by using standard cable ties. The undercut on the comb shaped profile provides secure strain relief according to EN 62444.

Compared to conventional metal or plastic cable clamps the icotek strain relief plates are a much more flexible and cost-effective solution. Because of the different variations of mounting rail and screw type assemblies, the system can be used for organising and securing cables e.g. in machines, switch cabinets, control panels or dynamic drag chains.

Advantages

- Simple assembly
- Cost-effective
- High packing density
- Vibration proof
- Universal usage

Increased packing density due to distance bushings

Also available with inlay bushing in brass / aluminum

EMC CABLE CLAMPS - EMI SHIELDING & EARTHING COMPONENTS

For process measurement and control equipment, an increasingly higher level of protection against failure is required. EMI shielding and earthing is very important. The area where the cable shield is connected to the earth is a critical point. It is very important that the connection has a low resistance. The EMC cable clamps offers a large contact area to the cable shield (see figure A). In comparison to conventional shielding brackets up to 50% higher contact area can be achieved when using the SKL line (see figure B). The specified clamping range can be exceeded up to 10%.

SKL shield clamps are available for several mounting types i.e. screwing them on metal plates or mounting them on DIN rails or bus bars. Properly sized and used in conjunction with cable ties, many EMC cable shielding products provide strain relief in accordance with EN 62444.

Advantages

- Optimal contact of cable shielding
- Permanent and continuous spring pressure on the cable shield, adjustment of spring load not necessary
- Large variety of assembly methods
- Many types with integrated strain relief
- Vibration proof, maintenance free
- Simple and mostly tool-free assembly
- High packing density possible

Standard solution:

CONFiX CABLE CONDUIT SYSTEM

The 90° angled conduit fitting CONFiX FWS is perfect for installation of parallel corrugated cable protection conduits, e.g. in machines, control panels or control cabinets. The liftable cover is tightly fixed by a hinge to the mounting box. Therefore, the system is very easy to handle. Corrugated conduits CONFiX WS for cable routing are used where cables have to be protected from mechanical damage or certain weather conditions. In addition, icotek offers split corrugated conduits CONFiX WST for routing pre-terminated cables and corresponding conduit clips CONFiX SH.

IP54 RoHS compliant Made in Germany

ENCLOSURE ACCESSORIES

For assembly of cable entry systems and EMC products icotek offers many useful accessories as well as helpful cable management components. Flanged plates with cut outs e.g. for enclosures as well as base plates for switch cabinets make work much easier by far. 10 x 3 mm bus bars and many more clever solutions like cable ties with hook-and-loop fastener that can be opened and closed numerous times as well as suitable holders and more round up our portfolio.

cRUUS up to IP64 up to NEMA 12 HL3 EN 45545-2 RoHS compliant Made in Germany

ATEX CABLE ENTRY

For use in potentially explosive atmospheres, icotek offers a wide range of cable entry systems for zones G (gas) and D (dust) in equipment group II, category 2 + 3, certified to the ATEX directive. The icotek cable entry systems comply with the EU Directive 94/9/EC (ATEX) for equipment and protective systems intended for use in potentially explosive atmospheres of zones 1, 2, 21 and 22.

Ex cRUUS up to IP68 up to NEMA 4X GL HL3 EN 45545-2 ECOLAB certified RoHS compliant Made in Germany

ICOTEK TOOLS - PUNCH DRIVER & KNOCKOUT PUNCHES

icotek now offers a small-sized hand hydraulic punch driver without hose which allows quick and easy punching of rectangular, square or round holes into stainless steel, mild steel, aluminium and plastics. The holes fit exactly the cut-out dimensions of most icotek cable entry systems. When you have to punch several holes, this hand hydraulic punch driver is much faster than manual wrench-style punches. Additionally, icotek offers round knockout punches for cut-outs, M16 - M63 as well as rectangular and square punches and dies, for cut-out sizes of 10 16 and 24 multi-pin industrial connectors and for cut-outs 46 x 46 mm and 46 x 112 mm.

INSTALLATION EQUIPMENT - Street Lighting

- Fuse Units • Isolator Units • Extension Boxes
- LED Lamp/Gear Tray (Specifically Designed for Street Lighting)

STREET LIGHTING CUT OUTS

Description	Price
F72 Fuse Unit Cut Out	€33.49
F144 CUT OUT	€25.58
IP 4 Earth Plate F 144	€13.87
F344-3 Phase Adaptor Box	€14.04
EP 5/25 Earth Plate	€15.81
LST Fuse 6-25A	€2.29
F244DL 2 Pole Cut Out C.W Earth Block	€51.39

LED LAMPS - LED RETROFIT LAMP (PRICE AVAILABLE ON APPLICATION)

Description

CE0038 38/100Watt c/w driver Specifically designed for Street Lighting
 RF036 Lamp - 36Watt - Designed for Street Lighting *No Driver*

- Providing instant energy savings up to 60%
- 7 Year Warranty
- Direct replacement for 70W SON & Metal halide lamps

RETROFIT LED GEAR TRAYS

Retrofit Gear Trays are designed to fit in a wide range of street light Heads.
 Contact a member of our technical sales team to discuss your requirements.

CABLE JOINTING KITS - STRAIGHT / BRANCH

- Easy to install, click together moulds
- Fully insulated mechanical connectors up to 50mm²
- Other mechanical connectors up to 400mm²
- Complete range of joints from 0.75-400mm²
- Available on both straight and branch formats
- Suitable for single and multi-core polymeric cables both stranded and solid copper/aluminum connectors
- Suitable for Armoured (SWA) & Unarmoured Cables
- Performance tested to BS6910/HD623 - Full test report available on request

ECONOMY LVI-0 RESIN JOINTS

A no nonsense resin joint replacing our BK joints. Comprising of a two part shell and our standard close mix two part resin bag. Rated up to and including 0.6/1kV. Ideal for general purpose street lighting and service cable jointing.

STANDARD LVI-1 RESIN JOINTS

Utilising our new one part mould construction and fully integrated resin system Features top seal and fixing clips and range taking foam seals. Rated up to and including 1.9/3.3kV Ideal for general purpose street lighting and service cable jointing.

PREMIUM LVI-2 RESIN JOINTS

Premium 2 part resin. Features top seal and fixing clips and range taking foam seals. Rated up to and including 1.9/3.3kV.

HAZARDOUS AREA LVI-3 RESIN JOINTS

Demonstrating superior performance using highly modified polyurethane resin both the joint shell and resin are flame retardant, hydrocarbon resistant and halogen free. Designed for specialist applications where hydrocarbons are present.

Scotchcast Branch, LV, Pilot and Telecom Joints also available.

LV INLINE COLD SHRINK TUBES

ⓘ *Cold Shrink Technology is designed to make cable joint as simple as possible. Our cold shrink range is an effective alternative to traditional resin based methods and can be used indoor, outdoor, overhead, or in cable trays.*

27761	€6.08

TRASP SYSTEM

After having inserted the strips into the strip container, the marking tool is used to extract the coding elements. Codes consisting of one or more elements are fully assembled on the marking tool, which is then inserted into the cavity provided in the sleeve or the clip-on. Once the coding elements have been inserted into the upper cavity of the sleeve, slight pressure of the left thumb on the end of the sleeve is sufficient to release the marking tool.

The advantages of the Trasp System:

- Time is saved because a complete identification marker can be assembled quickly and easily.
- It is possible to reduce the number of articles kept in stock, thus reducing storage costs.

TRASP SYSTEM

Code	Description	Price
012C/03	1 Tray Pre Assembled Starter Kit	€333.84
050C/03	2 Tray Pre Assembled Starter Kit	€485.68

TRASP STARTER KITS

Trasp Starter Kits – Everything you need to get Started.
We supply a full range of accessories that makes the TRASP System even more powerful!

STD TAPE DISPENSER

Has a compact design for easy handling and 10 refillable compartments to hold non-smear polyester tape rolls. This carry-along dispenser has an end loop that hooks it easily to a tool pouch/belt for added convenience. The pre-printed tapes have a high-tack, acrylic adhesive to resist solvents, oil and water while adhering firmly to insulation surfaces.

- For marking wire and cable
- Refillable dispenser
- Compact design for easy handling
- Includes 1 each of 0 to 9 numbered tape rolls
- Features an end loop to easily suspend it from a tool pouch or belt
- Durable plastic construction
- Withstands temperatures of -40 to 250 degrees F (-40 to 121 degrees C)
- Comes with a tape that has a high-tack, acrylic adhesive which resists solvents and water, making it ideal for marking wires and cables
- RoHS 2011/65/EU Compliant
- 25/case

STD TAPE DISPENSER

Code	Description	Price
STD0-9	STD Cable Marker Filled 09	€43.47

**Always on.
Always aware.
Always safe.**

Product Description

P/N: CMP10LVEX50Hz

Compass LV is a lightweight non-contact voltage and current detector. Its advanced notification system is designed to quickly warn the user of the presence of voltage and current on a work site. When an energized source is detected, users are notified of its approximate distance and direction with visual and audible alerts. Compass will also detect sources of voltage located overhead or underground.

- Clips Firmly Attach to Any Hard Hat
- Rated for 120 V - 600 V
- Visual & Audible Alerts
- Mute/Unmute Audible Alerts
- 360° Proximity Awareness of Danger
- Custom Sensitivity Settings
- Detects Current Through Most Solid Surfaces
- Dielectricly Tested to Match ANSI Z89.1 Class E
- Notifies 5x OSHA MAD
- Detects Delta Systems
- Smart Adaptive Setting
- IEC IP6X
- Up to Ten-Day Chargeable Battery Life

Voltage Detection:
Red lights indicate a detected Voltage from an energized conductor.

Current Detection:
Blue lights indicate a detected current from a load carrying conductor.

Proximity Alerts:
Rate and intensity of alerts increase as the user gets closer to a threat.

Applicable Industries:

Utilities | Gas and Water | Construction | Telecommunication | Arborist

Electrical Test & Measurement Instruments

We stock a comprehensive range of Electrical Test & measurement instruments, such as:

- Power Quality Analysers
- Installation Testers
- Photovoltaic Testers
- Digital Multimeters
- Process Calibrators
- Clamp meters
- Voltage Detectors
- Environmental Measurements
- Laser Distance Meters

We are industry experts in Electrical Test Instrumentation.
Discover new high quality products with the latest technology.
For Technical advice & support please contact a member of our sales team.

POWER QUALITY ANALYSERS PQA824/PQA823/HT9020

Power quality analysers designed for monitoring all electric parameters on single and three-phase installations. An in-depth verification of electric networks operation and increases the efficiency of installations and reducing consumption and costs.

PQA824 Available to Rent

INSTALLATION TESTERS - JUPITER/M74 & M75

A Multi-Function installation testers. Ensures the safety of people, electrical systems and buildings, and protect them against electrocution, fire and other equipment damage.

PHOTOVOLTAIC TESTERS SOLAR 300N/I-V500W & MPP300

A range of products to verify safety and efficiency of photovoltaic installations. This range includes 1500V I-V Curve Tracers, Insulation testers (IEC/EN62446), designed to provide more and more functional solutions for the activities to be performed.

DIGITAL MULTIMETERS HT21/HT210/MERCURY

The multimeter or voltage tester for those working in the electricity sector, must have the basic requirements of reliability, accuracy, and safety.

LASER DISTANCE METERS DM40/iDM70

Those Laser distance meters are the evolution of linear measurement with possibility of carrying out precision measurements, geometric calculations and transferring data onto your smartphone or tablet through the relevant App.

PROCESS CALIBRATORS/ HT8100 & HT8051

Process calibrators is now part of the range of mobile devices which have become indispensable to technicians working on modern installations.

CLAMP METERS

We stock a complete range of Clamp Meters. Hand Held Clamp Meter hand-held clamp meter for trms AC/DC current

VOLTAGE DETECTORS - HT20-HT82

Voltage Detectors, Circuit Breaker finder are Indispensable equipment which must always accompany the technician. Its essential characteristics are an extreme handiness, a very high protection degree and easiness of use.

ENVIRONMENTAL MEASUREMENTS

Thermometers, temperature, sound level, probes, air velocity meters are everything you need for controlling and monitoring the quality of the environment.

PHOTOVOLTAIC TESTERS

- Commissioning Tests - Certify a PV System Safety according to IEC62446 (PVCHECKs Device)
- Performance Recording: Solare300N, SolarI-Vw and MPP300

SOLAR300N

is also a powerful instrument for the complete analysis of mains quality in compliance with standard EN50160 (harmonic analysis, analysis of voltage anomalies, Flicker, unbalance, etc.). The management software provides the possibility of TopView also creating professional reports, which can be customized by adding the company's logo, the customer's data, comment, etc.,

For More information Contact our Technical Sales team at sales@rfe.ie

MULTI-FUNCTION INSTALLATION TESTERS WITH POWER QUALITY ANALYSIS

Item	Description	Price
PQA824/VEGA78	Three Phase Power Quality Analyser	POA
PQA820	Single Phase, Three Phase 3/4 Wire	POA
COMBI 420	Tests on Domestic and Industrial Systems	POA

PQA Available to rent, please contact a member of our sales team for further information.

M75 MULTIFUNCTION INSTALLATION TESTER

Item	Description	Price
M75	Safety verification devices in compliance with standard IEC/EN61557-1 with TRMS multimeter and LAN RJ-45 network cable mapping functions	POA
M74	Multimeter functions TRMS automatic sequence Ra, RCD and MΩ continuity of protective conductors with 200mA	POA

CLAMP METERS

Clamp meters HT9012/9014 Designed to Measure AC Current up to 600A and AC/DC Voltage up to 1000V to reach CAT IV 600V and II 1000V in Compliance with standard IEC/EN61010-1.

Item	Description	Price
HT9014	Professional clamp meter AC 600A TRMS, CAT IV 600V	POA
HT9012	Clamp meter AC 600A CAT IV	POA
HT7004	AC 300A TRMS Compact Clamp Meter	POA

DIGITAL MULTIMETERS WITH MEASUREMENT OF VOLTAGE AND PHASE SEQUENCE

Measurements of AC/DC voltage up to 600V and DC current up to 10A (HT25N) with complementary functions of resistance, continuity test, diode test and 9V and 1.5V alkaline battery tests. These devices have been designed in compliance with safety standard IEC/EN61010-1 with double protective insulation in CAT III 600V.

Item	Description	Price
HT21	Compact Digital Multimeters in CAT III 600V	POA
HR000MER	Mercury professional multimeter with built-in Thermal camera	POA

VOLTAGE PENS

Phase sequence and phase conformity test with LED indications and buzzer type.

Item	Description	Price
HT20	Pen phase detector with integrated torch	POA
HT70	Pen phase detector with measurement of phase sequence	POA
HT82	Self-Powered phase sequence	POA

DIGITAL MULTIMETER WITH MEASUREMENT OF VOLTAGE AND PHASE SEQUENCE

Performing the basic functions of a common digital tester, Model HT710 carries out measurements of AC/DC voltage, frequency, resistance and continuity test. Model HT712 also allows performing measurements of voltage and frequency and phase sequence with the innovative and patented method with 1 terminal also directly on the isolating sheaths of the cables.

Item	Price
HT710	POA
HT712	POA

PROCESS CALIBRATORS

To generate and measure DC current and voltage signals up to 10V and 24MA easy, by setting the values thanks to the innovative setting dial. For current measurement and generation you can also set data to be displayed as a percentage corresponding to the values set (0% = 4MA, 100% = 20MA). Voltage and current signal generation is also possible using up to 3 selectable ramps.

Item	Price
HT8100	POA
HT8051	POA
HT8000	POA

THERMOMETERS

Item	Description	Price
HT300	Thermometer for measuring temperature with K/J-type probe	POA
HT3320	Professional infrared video thermometer	POA

LIGHT METERS AND SOLAR IRRADIANCE METERS

Digital light meters used to measure illuminance up to 20KLUX (HT307) and 400KLUX (HT309) through a silicon photodiode sensor. Model HT309 also allows measuring illuminance of LED sources with various colours by setting the relevant correction factors, further to measuring luminous intensity (expressed in candles or LUX). Is a digital solar irradiance meter for measurements of solar irradiation up to 2000W/M2, which can be used as an inspection device, typically in photovoltaic installations.

Item	Price
HT307	POA
HT309	POA
HT204	POA

SOUND LEVEL METER

HT154 is a professional digital precision sound level meter, the ideal solution to carry out common inspection checks on environmental noise, verification of soundproofing levels, acoustic pollution, etc. The use of the device is extremely easy and immediate thanks to the wide lcd display and the management of operations through only 5 buttons. Sound level meter HT154 is provided with mobile calibrator for integrity checks before each operation and it is housed in a practical carrying case to transport it together with all accessories necessary for measurements.

Item	Price
HT154	POA

INFRARED THERMAL IMAGING INSPECTION CAMERAS

Applications

- Electrical/Mechanical
- Solar Panel Inspection
 - Buildings
- Under Floor Inspection
 - Fever Detection
 - Process
 - Surveillance
- Report IR Software Included

(Prices on Application) Level 1, 2 & 3 Thermography Training also available.

INSULATED CARPET

Model	Description	Price
WI 3/100	Thickness 3mm Voltage Test 30,000V, Anti-sliding Surface, Grey, Max Operating Voltage 26,500. Supplied in 10 Metre Lengths. Conforms to Standard IEC IIII.	€67.27 P/Mtr

INSULATED GLOVES (CE MARK)

Model	Description	Nominal Volt	Price
GI 2.5	Voltage Test 2,500	500	€42.66
GI 5	Voltage Test 5,000	1,000	€49.80
GI 10	Voltage Test 10,000	7,500	€69.89
GI 20	Voltage Test 20,000	17,000	€77.17
GI 30	Voltage Test 30,000	26,500	€101.92
VPG 90	Pneumatic Tester for Insulating Gloves		€171.81
Cust/GI	Plastic Case for Insulating Glove		€13.98

HELMET WITH BUILT IN VISOR FOR ELECTRICIANS

Helmet according to DIN EN397 & VDE 0680 Part 1, Retractable Visor, Full Facial Protection, Against accidental switching and Arc Flash. Visor: Scratchproof Polycarbonate, transparent 2mm Thick.

Model	Price
AV9303W	€151.66

RESCUE ROD

High Insulation tube rod made of Polyester resin reinforced with fibreglass. Tube Ø 32mm Voltage 63kv Length 2m. 1 Piece.

Model	Price
FS63	€174.72

INSULATING PLATFORM (500X500X4MM)

With antislip surface made of fibreglass resin reinforced with insulated plastic legs - Insulation 30kv

Model	Price
WI30	€74.55

INSULATED PLASTIC PEGS

Plastic Peg/Clamp 1000v Insulated

Model	Price
PI/96	€23.30

SAFETY EQUIPMENT - Substation Rescue Kits

- Wall Mounted 24kV Substation Rescue Kit (Prices Available on Request)

Dielectric Insulating Safety boots – ELE20/9

- Fully insulating gloves each test stamped for working voltages – manufactured to EN60903
- Tested voltage to 20kV
- Added Safety protection of a 200 Joule steel toe cap and rubber sole
- Manufactured to EN345-1992 and ASTM F1117-93
- Non-absorbent polyester lining
- Kick off lug for easy removal
- Oil resistant outsole to EN345

25KV Cable Cutters

- Double heat-treated drop-forged blade
- No breakdown of insulation in tests to 50kV
- Handles of fibre reinforced plastic
- Replaceable blade
- Special tool steel head
- Cutting capacity
IV150mm²/VVR22-3C/CV100mm²/CVT22mm²
- Overall length: 460 mm
- Weight: 980 g

IP66 grade wall mounted storage box

- Body Colour; Grey
- Material; Polycarbonate
- Depth; 800mm/31.5"
- Height; 300mm/11.8"
- Width; 600mm/23.6"
- IP rating; IP66
- UV stabilised thermo plastic

Insulated Rescue Hook – 24kV rated

- Humidity-proof seals on each end
- M-10 metric head
- Total length of 1.75 M
- Working voltage: 45 kV

Class 3 Electrical Insulating safety gloves with case – ELE14/9

- Fully insulating gloves each test stamped for working voltages – manufactured to EN60903
- Length 360mm
- Thickness; 2.9mm
- Test voltage 30kV
- Working Voltage 26.5kV
- Class 3

Voltage detector

- Works with no battery.
- For Indoor use.
- Rated voltage: 5 to 36 kV
- Insulating pole 1.25M
- Frequency: 50 Hz

Safety insulation platform

- Manufactured from copolymer polypropylene plastic, according to the Standard UNE 204001
- Rough, non-slip surface
- Rubber feet gives high adherence to the floor surface
- Stable, high impact and slip resistance
- Platform: 525 x 525mm; Surface: 575 x 575mm

INSULATING RODS		
MODEL	SIZE	PRICE
PR1/150	GS- L=1.5m - 1 Piece - ØTube 32mm	84.24
PR1/200	GS- L=2m - 1 Piece - ØTube 32mm	113.57
PR1/250	GS- L=2.5m - 1 Piece - ØTube 40mm	100.88
PR2/300	GS- L=3m - 2 Pieces - ØTube 40mm	147.68

Rods in fibreglass tube for switches disconnection complete of hand guard, metallic hook & fast connection for the models with two elements. • Test by ENEL. • Test by USSL • Test by Electrotechnic Italian Institute GALILEO FERRARIS of Turin. • Certificate in agreement to the NBN 761.03 Standard (Belgium).

PLEASE SPECIFY CONTACT ATTACHMENTS FROM TABLE BELOW

CLAMP TYPE	
MODEL	Description
Type G	Steel hook
Type B	Steel bayonet
Type D	Aluminium DIN bayonet
Type F	Plastic threaded for tube 40mm diameter
Type FA	Aluminium threaded for tube 32mm diameter
Type CH	Aluminium CH22/26 hexagonal
Type EF	Plastic CH12 thread M10
Type U	Universal

DENOMINATION EXAMPLES

PR1/200 B Rod 2m length in unique piece with Type B steel bayonet attack.
 P2/300 F Rod 3m total length in 2 pieces of 1,5m each with Type F plastic threaded attack.
 PR3/600 G Rod 6m total length in 3 pieces of 2m each with Type G steel hook attack.

SPECIFICATION FOR SHORT-CIRCUITING AND EARTHING SYSTEMS

CHARACTERISTICS

- Selected connection type: Sketch No _____
- Connect clamps (type MT - _____)
- Short-circuiting cable (§ A)
 - Length (m) _____
 - Dia. or section (mm, mm²) _____
- Grounding cable (§ B)

RTC 3600	DC voltage electronic detector with visual & acoustic indicator. Built-in self control check. 500-3600vDc	866.32

Price includes two part rod, 2 x 2 metres = 4 metres
 Fabric Bag for rod - metallic contact probe
 - copper cable -ground clamp

SAFETY EQUIPMENT - PPE (Personal Protective Equipment)

SAFETY HARNESSES & LANYARDS - FALL PROTECTION

ARC-BALA-HE

High Energy Arc Flash protective Balaclava for electricians. With dual eye port design. ATPV 45 cal/cm². Must be worn with additional PPE. The product is designed to protect eyes and face, if used as intended, against the mechanical and thermal hazards of an arc flash during live working or when staying in the vicinity of live parts. It is not intended for arc welding, especially not to protect against long term high heat, chemicals or any other radiation than emitted by an arc flash.

Code	Material	Weight	Colour	Standard
ARC-BALA-HE	Triple layer; Carbonized fiber (100 % Carbon-X)	176g (6.21oz)	Black	ANSI Z87.1, ASTM F2178, EN 166, NFPA 70E

ARC-SK1-PC-8

Arc Flash Protective Face Shield Kit. Includes cap bracket with US clips. With Standard Coating. Tested to an ATPV of 8 cal/cm² as per ASTM F2178 (Open Arc Test). Meets NFPA 70E (HRC 2). The product is designed to protect eyes and face, if used as intended, against the mechanical and thermal hazards of an arc flash during live working or when staying in the vicinity of live parts. It is not intended for arc welding, especially not to protect against long term high heat, chemicals or any other radiation than emitted by an arc flash.

Code	Material	Window Size	Weight	Colour	Standard
ARC-SK1-PC-8	Polycarbonate	18,4 x 50,8 x 0,15 cm (7.25" x 20" x 0.06")	298g (10.5oz)	Green	ANSI Z87.1, ASTM F2178, NFPA 70E

Critical Asset Surveillance Technologies (CAST)

- Infrared Inspection Windows
- Wireless Temperature Monitoring System
- Intelligent Asset Monitoring System & Ultrasound Detection

IR windows, EMSD's (Electrical Maintenance Safety Solutions), ultrasound ports, and asset tracking for the electrical industry to save time, money, and lives

The CAP Series Infrared Windows

The IRISS CAP Series of infrared windows are the largest standard sized IR windows available in the marketplace today. The series incorporates a rectangular design available in standard sizes of 4, 6, 12, and 24 inches and allows for more freedom to inspect multiple components through one infrared window. This reduces the number of IR windows required and the installation time and costs associated with multiple round window installations.

The Delta-T Wireless Monitoring Temperature Alert System

Delta-T Alert™ is a wireless, self-contained temperature monitoring sensor that attaches to an electrical enclosure. The patented Delta-T Alert™ unit is simple to install and comprises of two temperature sensors – one to monitor the electrical enclosure's interior temperature and the second to monitor the ambient room temperature where the enclosure is located. Delta-T Alert™ sensors are configured to collect data daily at specific time intervals. The data is wirelessly transmitted for analysis and trending and warns the operator of temperature issues within their electrical enclosures – well before more serious problems occur Delta-T provides an easier, more effective way to prevent costly electrical damage and system downtime.

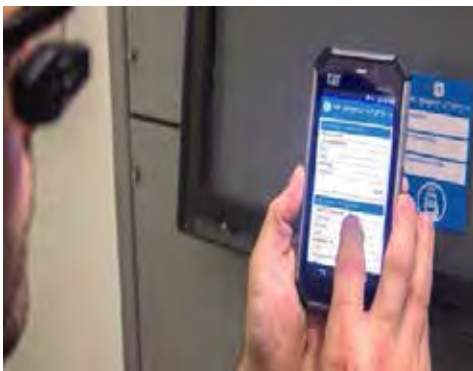

Critical Asset Surveillance Technologies (CAST)

- Infrared Inspection Windows
- Wireless Temperature Monitoring System
- Intelligent Asset Monitoring System & Ultrasound Detection

IR windows, EMSD's (Electrical Maintenance Safety Solutions), ultrasound ports, and asset tracking for the electrical industry to save time, money, and lives

E Sentry Connect System

The E Sentry Connect™ is our next generation intuitive asset information tagging system. The E Sentry Connect system utilizes Near Field Communication (NFC) contactless Smart Card technology that allows smart-phone devices with NFC to easily access critical data relating to the equipment being inspected and also save up-to-date inspection data directly to the assets E Sentry Connect tag via a free App from IRISS. The E Sentry Connect Tagging system has been designed to be operated on 2 platforms, a standalone system and a subscription based cloud system allowing historical data back-up and complete access to the current status of all assets utilizing E Sentry Connect tags.

The Sonus Series For Ultrasound Port Inspections

The versatility of Sonus XT makes it ideally suited to work with any plant maintenance program and the perfect complement to other Predictive Maintenance (PDM) Technology. Ultrasound detection can be utilized to detect early warning signs of

equipment failure and to conduct energy conservation audits. Quickly and Safely perform closed panel airborne Ultrasound inspections of electrical equipment including Switchgear, Switchboards, Panel boards, Transformers, Motor Control Centres and Process Equipment Panels to detect early warning signs including such as Arcing, Tracking and Corona. Fast and accurate diagnosis of problems using the Sonus XT will save you time and money.

SAFETY EQUIPMENT

- (LOTO) Lockout Tagout Safety Products

Essential Products for Lockout/Tagout systems in the workplace, over 1,500 safety products available

Applying Lockout/Tagout

Energy isolation and Lockout/Tagout are to be applied only by trained employees authorised to perform service or maintenance. Before Lockout/Tagout is applied, all employees who work in the affected area must be notified. Legislation requires that control of hazardous energy be done according to a step-by-step procedure.

1) Preparation For Shutdown

Before you turn off any equipment in order to lock/tag it out, you must know:

- ◆ The types and amounts of energy that power it.
- ◆ The hazards of that energy.
- ◆ How the energy can be controlled

2) Equipment Shutdown

Shut the system down by using the operating controls. Follow whatever procedure is applicable for the equipment so that you don't endanger anyone else during shutdown.

3) Equipment Isolation

- ◆ Install all energy-isolating devices so that the equipment is isolated from its energy source.
- ◆ Be sure to isolate all energy sources and secondary power supplies as well as the main one.
- ◆ Never remove a fuse instead of disconnecting the energy or power.

4) Application Of Lockout Devices

- ◆ All energy-isolating devices are to be locked and tagged according to your company Lockout/Tagout procedures.
- ◆ Only the standardised devices supplied by your employer should be used for Lockout/Tagout and they should not be used for anything else.
- ◆ Use a Lockout device if your padlock cannot be placed directly on the energy control.
- ◆ When a Lockout device is used, every employee can lock out a single energy-isolating device.
- ◆ For large jobs, a Lockout Box can be used to maintain control over a large number of padlocks and keys.
- ◆ If tags are used together with a padlock, ensure they are securely fastened to the padlock.
- ◆ Fill tags out completely and correctly.

5) Control Of Stored Energy

Take any of the following steps that are necessary to guard against energy left in the equipment after it has been isolated from its energy sources.

- ◆ Inspect the system to make sure all parts have stopped moving.
- ◆ Relieve trapped pressure.
- ◆ Release the tension on springs, or block the movement of spring-driven parts.
- ◆ Block or brace parts that could fall because of gravity.
- ◆ Block parts in hydraulic and pneumatic systems that could move from loss of pressure.
- ◆ Bleed the lines and leave vent valves open.
- ◆ Drain process piping systems and close valves to prevent the flow of hazardous materials.
- ◆ If a line must be blocked where there is no valve, use a blank flange.
- ◆ Purge reactor tanks and process lines.
- ◆ Dissipate extreme cold or heat, or wear protective clothing.
- ◆ If stored energy can reaccumulate, monitor it to make sure it stays below hazardous levels.

6) Equipment Isolation Verification

Take any of the following steps that fit your company's equipment and energy control program:

- ◆ Make sure all danger areas are cleared of personnel.
- ◆ Verify that the main disconnect switch or circuit breaker cannot be moved to the 'on' position.
- ◆ Use a voltmeter or other equipment to check the switch.
- ◆ Press all start buttons and other activating controls on the equipment itself to PROVE that it is isolated. (This procedure is vital. Many accidents happen due to isolating the wrong control switch and not testing prior to commencing work)
- ◆ Shut off all machine controls when the testing is finished.

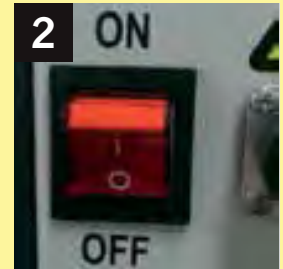

7) Performing The Work

Look ahead and avoid doing anything that could re-activate the equipment. Don't bypass the lockout when putting in new piping or wiring.

Simple steps for Locking Out

1 Plan and prepare

2 Shut down equipment in a normal manner

3 Disconnect energy isolation devices

4 Application of Lockout/tagout devices

5 Render all stored and residual energy safe

6 Verify equipment isolation

7 Perform work safely

8 Reactivation by responsible person

MLH1 Stainless Steel Lockout Hasp

Manufactured from 316 stainless steel with a bright, durable nickel plated finish. Ideal for use in all industrial environments.

Code
MLH1

MLH4 Aluminium Lockout Hasp

Double scissor action lockout hasp manufactured from aluminium, with 25mm and 38mm diameter jaws. Overall length 149mm. Accepts padlocks with a shackle diameter up to 7.5mm.

Code
MLH4

MLH7 Flexible Lockout Hasp

Manufactured from heavy duty flexible nylon with 80mm clearance. Can easily be manipulated into place. Ideal for difficult applications. Accepts padlocks with a shackle diameter up to 9mm.

Code
MLH7

MLH10 Stainless Steel Lockout Hasp Thin

The MLH10 lockout hasp is manufactured with a small 3mm diameter hasp making it ideal for those 'small hole' applications.

- ◆ Accepts up to 6 padlocks
- ◆ 10mm dia padlock holes
- ◆ 30mm vertical hasp clearance
- ◆ Stainless steel

Code
MLH10

MLH5 Safety Lockout Hasp

Manufactured from steel with a red plastic coated body. Scissor action with 25mm diameter jaw size. Accepts padlocks with a shackle diameter up to 10mm.

Code
MLH5

MLH6 Safety Lockout Hasp

Manufactured from steel with a red plastic coated body. Scissor action with 38mm diameter jaw size. Accepts padlocks with a shackle diameter up to 10mm.

Code
MLH6

New

Nylon Body Safety Padlocks Supplied With Steel Shackles or Non-Conductive Plastic Shackles

These nylon body safety padlocks with steel or non-conductive plastic shackles are a cost effective solution to meet your lockout requirements.

- ◆ High security key cylinder
- ◆ 2 keys to each lock
- ◆ Bodies and keys stamped with key number as standard
- ◆ 9 different colour options available for clear identification
- ◆ Available keyed to differ and keyed alike
- ◆ Standard safety/owner labelling on both sides included
- ◆ Can be engraved if required
- ◆ Other keying systems available upon request
- ◆ Durable and lightweight with non-conductive lock bodies
- ◆ 38mm wide x 44mm bodies, vertical shackle clearance 38mm, shackle diameter 6.4mm

Both steel and plastic shackle padlocks are supplied Keyed to Differ or Keyed Alike as standard. Other keying options can be made upon request.

Explanation of Keyed to Differ

All locks have a different key

Explanation of Keyed Alike

One key fits a series of locks

The nylon padlock body and both keys are stamped with identification letters/numbers as standard.

Zenex Padlocks

These Zenex lockout padlocks are ideal for lockout applications.

- ◆ Durable, lightweight with non-conductive Zenex lock bodies.
- ◆ High security 6 pin cylinder lock, up to 100,000 different locking mechanisms.
- ◆ 1 key to each lock.
- ◆ Key retaining ensures that padlocks are not left unlocked.
- ◆ 8 different colour options available for clear identification.
- ◆ Available keyed to differ, or keyed alike in 8 colour coded suites.
- ◆ Standard 'Do Not Remove' label and write on property labels included.
- ◆ Can be engraved if required.
- ◆ 38mm wide x 44mm bodies, vertical shackle clearance 38mm, shackle diameter 6.4mm.
- ◆ Lock and key number records for this range can be maintained by RFE Safety upon request.

Supplied with front and rear labels

- ◆ Available with 2 standard keying options, keyed to differ or keyed alike.
- ◆ Other keying options can be made upon request (eg. Master & Differ).

S25K	Keyed alike (brass shackle)

Brass Combination Padlocks

The RFE re-settable combination padlocks are ideal for a wide range of applications, with a 4 digit combination giving an impressive 10,000 different possible combinations.

Combinations are factory set at 0000 and are easily changed to a memorable number.

The chosen combination number can be changed at any time should a breach of security arise.

Code	Description
BCT2035	21mm body, 22mm clearance and 3mm diameter shackle
BCT1040	40mm body, 26mm clearance and 5mm diameter shackle

Stainless Steel Padlocks

This marine grade padlock is fully manufactured from stainless steel and is designed to be used in very harsh/aggressive environments.

- ◆ Stainless steel body/shackle.
- ◆ 5 pin high security cylinder mechanism.
- ◆ Supplied with random locking mechanisms.
- ◆ Double ball bearing deadlock.
- ◆ Key retaining when shackle is open.
- ◆ 40mm body, vertical shackle clearance 51mm, shackle diameter 7mm.
- ◆ Lock and key number records are not maintained by RFE Safety for this range.

Code	Description
R2340	Stainless steel padlock

RFE (REG FARRELL ENGINEERING LIMITED)

SAFETY EQUIPMENT

- (LOTO) Lockout Tagout Safety Products

Universal Lockout Device for Fuse Holders

- ◆ Will lock out most types of fuse holders - One size fits all.
- ◆ Lock out 20 Amp to 400 Amp fuse holders.
- ◆ 8mm padlock hole - max clamping 5mm.
- ◆ Made from sturdy nylon plastic.
- ◆ Dimensions: 60x35x15 mm wide.

Code	Description
UFL2	Universal Fuse Lockout

Bottle Fuse Lockouts

The new bottle fuse lockout is available in two sizes to fit DZ3 and D02 Fuses. Remove the fuse, screw in the lockout device and secure using a cable lockout and padlock.

D02 for small fuses
DZ3 for large fuses

Code	Description
D02	Small bottle fuse lockout
DZ3	Large bottle fuse lockout

Fuse Lockout Station

This fuse lockout station includes a selection of lockout equipment for a wide range of applications. Shadow profiles on the board highlight the position of the equipment.

Complete with the following:

- 4 x TT38RED Padlocks
- 1 x S806 Cable Lockout
- 2 x MLH7 Lockout Hasps
- 1 x D02 Bottle Fuse Lock
- 1 x DZ3 Bottle Fuse Lock
- 1 x RFL1 Fuse Lockout
- 1 x RFL2 Fuse Lockout
- 1 x RFB3 Fuse Blockout
- 1 x RFB4 Fuse Blockout
- 1 x RFB5 Fuse Lockout
- 1 x UFL2 Fuse Lockout
- 3 x LSE10T Packs of 10 Tags

Size: 500mm H x 420mm W

Code	Description
LSE308FS	Fuse lockout station with equipment

Slimline Universal Fuse Lockout

Our RFB5 universal fuse lock has similar properties to the UFL2. However, its slimline, low profile design allows this to be used on fuse carriers that are fitted within enclosures, very close to the door.

By using the RFB5, fuse carriers can be locked off and the enclosure door still closed.

Code	Description
RFB5	Slimline Fuse Lockout

Universal Fuse Lock and Block Kit

An ideal kit for locking and blocking all types of bladed fuses and fuse holders.

This kit contains 5 different devices (UFL2, RFL1, RFL2, RFB3, RFB4), along with a TT38RED padlock, pack of 10 RPT32AR tags and pen, all packed in a strong canvas waist bag allowing contents to be carried at all times.

Code	Description
FBLKIT	Fuse Lock and Block Kit

SAFETY EQUIPMENT

- (LOTO) Lockout Tagout Safety Products

IEC detachable Power Cord Lockout

Equipment fitted with the popular IEC type input power connector can now be secured using the IEC lockout. This device will fit most computers, test instruments, power supplies, monitors, lab equipment etc.

The IEC lockout features an elastomeric nose that bulges to firmly grip to the interior surfaces of the connector housing. This palm-sized, lightweight, simple device is made of durable nylon that accommodates a personal padlock for lockout and security applications.

Code	Description
IEC	IEC lockout

Push Button Lockout Cover

Designed to fit over push button switches to prevent accidental operation. Overall 50mm dia. with 30mm dia. hole. Secured with padlock - max. shackle dia. 7mm.

Strong double sided securing tape included.

Code	Description
SC0100	Push button cover

New

'Big Red Bag' Control Panel Cover

This 'Big Red Bag' entirely envelops the control panel of machinery and equipment, and is highly visible.

The cover slides over the control panel, from the top, bottom, left or right. The neck of the cover is closed by the toggle cord, and finally the lockout device is tightened and padlock secured.

Code	Description
BIGRED	'Big Red Bag' control panel cover

Plug Lockouts

- ◆ Especially developed to secure all types of plugs.
- ◆ Completely encloses electrical plugs to prevent accidental reconnection.
- ◆ Two sizes available.

Model LP330 90 x 50 x 50mm
Model LP770 180 x 80 x 80mm

Padlock not included

Code	Description
LP330	Small plug lockout
LP770	Large plug lockout

Safety Lockout Bag

Padlockable safety lockout bag ideal for use on larger 3 phase plugs.

Plug and electrical cable are placed inside the bag, the cord is tightened around the cable, then the cord clamp is closed and padlock attached, or multiple padlocks with a lockout hasp.

Ensures the plug cannot be removed until all maintenance work is completed and all padlocks removed.

Size: 460mm H x 250mm W

Code	Description
YSLB1	Safety lockout bag

Plug and Pendant Lockout Station

This plug and pendant lockout station includes a selection of lockout equipment for a wide range of applications. Shadow profiles on the board highlight the position of the equipment.

Complete with the following:

- 4 x TT38RED Padlocks
- 2 x MLH7 Lockout Hasps
- 1 x YSLB1 Lockout Bag
- 1 x R453XXL Pendant Lockout Bag
- 2 x Plugblock plug lockouts
- 2 x RPSL1 Plug Lockouts
- 1 x LP330 Small plug box
- 1 x LP770 Large plug box
- 3 x LSE10T Pack of 10 Tags

Size: 620mm H x 680mm W

Code	Description
LSE314FS	Plug and Pendant lockout station

SAFETY EQUIPMENT

Gate Valve Lockouts

Gate valve covers are a simple, low cost, effective way to prevent unauthorised operation of valves. Valve covers consist of two flattened half moons that completely cover the valve handwheel. Once locked, the cover rotates freely around the handwheel preventing operation.

- ◆ Made of strong polypropylene plastic
- ◆ Fully dielectric
- ◆ Highly resistant to cracking and abrasion
- ◆ Resistant to extreme temperature changes
- ◆ Available in 5 sizes to fit handwheels 25mm (1") to 355mm (14")

Model	Hand Diameter	A	Shank Height	B	Overall Diameter	C	Overall Height	D	Lock Hole	E	Valve Handle Size
VS02	25 (1")	1.250"	32 mm	76 mm	3.000"	76 mm	1.500"	38 mm	0.312"	8 mm	1" - 2 1/2"
VS04	50 (2")	1.750"	32 mm	140 mm	5.500"	140 mm	1.750"	44 mm	0.375"	9.5 mm	2 1/2" - 5"
VS06	75 (3")	2.000"	32 mm	177 mm	7.000"	177 mm	2.000"	50 mm	0.375"	9.5 mm	5" - 6 1/2"
VS09	100 (4")	2.000"	50 mm	267 mm	8.500"	267 mm	2.500"	61 mm	0.375"	9.5 mm	6 1/2" - 10"
VS13	140 (5.5")	2.500"	61 mm	368 mm	11.000"	368 mm	3.000"	73.8 mm	0.375"	9.5 mm	10" - 14"

Red valve covers supplied as standard, other colours available on request.

Code	To fit valve handwheel diameter
VS02	25mm to 70mm (1" to 2.1/2")
VS04	70mm to 130mm (2.1/2" to 5")
VS06	130mm to 170mm (5" to 6.1/2")
VS09	170mm to 257mm (6.1/2" to 10")
VS13	257mm to 355mm (10" to 14")

Quarter Turn Ball Valve Lockouts

A quick and simple way of preventing the operation of quarter turn ball valves.

Manufactured from steel with powder coat finish - 2 sizes available, both accept padlocks with a shackle diameter up to 9.5mm

- ◆ Easy slide-on application
- ◆ Colour: red

Step 1 Slide on Step 2 Squeeze together Step 3 Apply lock

Code	Description
BS07	To fit valve levers 6mm to 25mm wide
BS08	To fit valve levers 32mm to 76mm wide

Valve Lockout Station

This valve lockout station includes a selection of lockout equipment for a wide range of applications. Shadow profiles on the board highlight the position of the equipment.

- Complete with the following:
- 1 x VS02, VS04, VS06, VS09, VS13 Gate Valve Lockouts
 - 1 x BS07 Ball Valve Lockout
 - 1 x BS08 Gate Valve Lockout
 - 1 x BS16 Ball Valve Lockout
 - 1 x BS17 Gate Valve Lockout
 - 2 x MLH7 Lockout Hasps
 - 3 x LSE10T Packs of 10 Tags
 - 6 x TT38RED Padlocks

Size: 875mm H x 825mm W

Code	Description
LSE309FS	Valve lockout station with contents

Valve Position Notification Labels

Highly visible labels to notify the position of a locked out valve. They are available in five sizes designed for our range of Gate Valve Lockouts (VS02, VS04, VS06, VS09, VS13).

Supplied as a single sheet with one of each message label on self-adhesive vinyl.

Code	Description
VSET1	Status labels for VS02/Sheet
VSET2	Status labels for VS04/Sheet
VSET3	Status labels for VS06/Sheet
VSET4	Status labels for VS09/Sheet

Ball Valve Lockouts

Ball valve lockouts are available in 3 sizes to lock your ball valves from 9.5mm (3/8") to 200mm (8"). These simple, easy to use lockouts clamp over the valve lever, preventing the valve from operating, and lock in place using a padlock.

Red ball valve lockouts supplied as standard, other colours available on request.

Models BS01 & BS02 can lock valves in the 'open' or 'closed' positions.
Model BS03 locks 'closed' only.

Models	Width	A	Height	B	Length of Handle	C	Lock Hole	D
BS01	3.100"	1.750"	5.375"	to 7.500"	0.312" dia.			
	80 mm	82 mm	135 mm	to 190 mm	8 mm			
BS02	1.750"	5.000"	7.500"	to 10.000"	0.312" dia.			
	95 mm	125 mm	190 mm	to 250 mm	8 mm			
BS03	4.000"	7.450"	12.000"	to 17.500"	0.312" dia.			
	100 mm	186 mm	302 mm	to 438 mm	8 mm			

BS01

BS03

BS01/BS02

BS02

BS03

Code	To fit ball valve size
BS01	9.5mm to 31.5mm (3/8" to 1.1/4")
BS02	37.5mm to 62.5mm (1.1/2" to 2.1/2")
BS03	50mm to 200mm (2" to 8")

Butterfly Valve Lockouts

The butterfly valve lockout is a simple, effective way to secure your butterfly valves to prevent unauthorised operation.

Code	Description
BS04	Butterfly valve lockout

Red valve lockouts supplied as standard, other colours available on request.

Key Storage Stations

Ideal for keeping keys stored in a central location, these mobile and wall mountable key stations are made from 6mm rigid PVC for durability and rigidity.

The mobile station holds 48 keys and comes with a robust handle attached for easy carrying and a protective aluminium foot strip.

The wall mountable stations hold 64 or 125 keys and are pre-drilled for easy installation.

Custom stations can be made to order. Please ask for details.

Code	Description
MKS48	48 Key Board
WMKS64	(Mobile)64 Key Station
WMKS125	125 Key Station

125 Hook Key Station

Miniature Circuit Breaker Lockouts

A range of four padlockable circuit breaker lockouts designed to fit most modern single and multiple pole miniature circuit breakers.

Manufactured from strong nylon, this range of miniature circuit breaker lockouts allows breakers to be locked off individually.

Code	Description
CB05	MCB lockout inside prongs
CB06	MCB lockout outside prongs
CB07	MCB lockout wide inside prongs
CB08	MCB lockout thumb wheel

CB05

Push button operated and locates into the 2 holes either side of the breaker switch (see illustration). Fits most popular breakers up to 60 Amp. Will also fit breakers connected with a cross bar. Locates prongs inside.

CB06

Push button operated and locates into the 2 holes either side of the breaker switch (see illustration). Fits most popular breakers up to 60 Amp. Will also fit breakers connected with a cross bar. Locates prongs outside.

CB07

Push button operated and locates into the 2 holes either side of the breaker switch (see illustration). Extra wide for larger breakers over 60 Amp. Will also fit breakers connected with a cross bar. Locates prongs inside.

CB08

Adjustable thumb wheel operation and fits larger or multi-pole circuit breakers connected with a cross bar. No holes in the breakers are required.

'No Hole' Circuit Breaker Lockouts

This range of 'No Hole' circuit breaker lockouts are ideal for breakers that do not have any built in locking facility. The unique design, with thumb wheel operation clasps onto the switch providing secure locking protection. Available in 3 sizes. Can be used with lockout cleats for hard to lock longer sliding switches and switches with large angular rotation.

- CB09** Fits switches 16.5mm wide x 11.6mm thick (up to 277 Volt).
- CB10** Fits switches 41.2mm wide x 13.9mm thick (480/600 Volt).
- CB11** Fits oversized switches 63.5mm wide x 22.2mm thick (usually 480/600 Volt).

Lockout Cleats

Compatible with models CB09 and CB10, ensures positive lockout for hard to lock long sliding switch throws and switches with a large angular rotation. Snap-on and off design allows for use only when needed.

Code	Description
CB09	277 Volt lockout
CB10	480/600 Volt lockout
CB11	480/600 Volt oversize lockout
CLT1	Cleat for use with CB09
CLT2	Cleat for use with CB10

MCB 'Toggle Lock'

Possibly the simplest yet most versatile MCB lockout in our range. The CB12 'Toggle Lock' simply fits over the MCB toggle, and then the internal grub screw is tightened using a small flat screwdriver which secures the CB12 onto the toggle. Once tight and secure, insert a padlock which blocks access to the grub screw so the device cannot be removed or toggle operated until the lock is removed.

Code	Description
CB12	Toggle Lock

SAFETY EQUIPMENT

MCB 'Toggle Lock'

Possibly the simplest yet most versatile MCB lockout in our range. The CB12 'Toggle Lock' simply fits over the MCB toggle, and then the internal grub screw is tightened using a small flat screwdriver which secures the CB12 onto the toggle. Once tight and secure, insert a padlock which blocks access to the grub screw so the device cannot be removed or toggle operated until the lock is removed.

Code	Description
CB12	Toggle Lock

Grip Tight MCB Lockouts

Secure mounting for a solid lockout. Grips tight with simple thumb turn and clamping handle. The Grip Tight Circuit Breaker lockout offers superior holding power compared to other devices.

Universal fit. Exclusive design accommodates many styles of breaker toggles.

Durable construction. The Grip Tight lockouts are made of powder coated steel and reinforced polymer to operate in harsh conditions.

Compact design. The narrow profile permits side-by-side breaker lockout. These compact devices are also easy to carry and easy to store.

Two styles available:

Model CB13 locates sideways onto the toggle and is ideal for tall and wide toggles.

Model CB14 locates over the toggle and is ideal for use with single and double toggles.

Easy Operation:

1) Move breaker to off position. Open red handle.

2) Place CB14 lockout over breaker toggle (CB13 fits sideways). Turn black knob clockwise until grips touch toggle. Do not overtighten. When the handle is closed the grips will tighten against the toggle.

3) Move lockout handle to closed position. Check that lockout is secure and breaker can not be moved to 'on' position. Apply padlock.

Code	Description
CB13	Grip Tight MCB lockout
CB14	Grip Tight MCB lockout

Breaker Blocker 480-600V Lockout

Perfect for locking out oversized and irregularly shaped switches.

Self-adhesive backed rails are permanently installed onto an electrical panel. Simply clean panel surface and adhere.

No drilling required!

Universal Lockout for Miniature Circuit Breakers

- ◆ Will lock out many types of miniature circuit breakers.
- ◆ Locks out 1 pole through to 4 pole circuit breakers.
- ◆ Dimensions: 45mm x 25mm x 10mm.
- ◆ Made from durable plastic.
- ◆ Maximum clamping 8 mm.
- ◆ 8mm padlock hole.

Code	Description
UCL1	MCB lockout

Universal Lockout for Moulded Case Circuit Breakers

- ◆ Locks out most types of moulded case circuit breakers.
- ◆ Locks out 1 pole through to 4 pole circuit breakers.
- ◆ Dimensions: 51mm x 25mm x 23mm.
- ◆ Made from durable plastic.
- ◆ Maximum clamping 13mm.
- ◆ 8mm padlock hole.

Code	Description
UCL2	Moulded case lockout

Lockout for Large Circuit Breakers

- ◆ Locks out most types of large circuit breakers with a toggle.
- ◆ Locks out 1 pole through to 4 pole circuit breakers.
- ◆ Made from durable plastic.
- ◆ Dimensions: 125mm x 63mm x 40mm wide.
- ◆ 8mm padlock hole.
- ◆ Clamping 12mm to 19mm.

Code	Description
UCL5	Large toggle

Universal Multi-Functional Breaker Lockout

Designed to fit most MCB's and main switches our CB17 is ideal for use on domestic and industrial applications.

Extra length clearance on the toggle side allows the device to be used on breakers with extra long toggles, as well as the standard size.

Thicker main switches are accommodated on the opposite side making this 2-in-1 device truly multi-functional in today's market.

Code	Description
CB17	Multi-functional lockout

Circuit Breaker Lockout Station

Complete with the following:

- 4 x TT38RED Padlocks
- 2 x MLH7 Lockout hasps

Code	Description
LSE315FS	Circuit breaker lockout station

Merlin Gerin Powerpact 4c Toggle Padlocking Attachment

This device locates in the slot behind the switch toggle when in the off position, blocking its operation. Adding a padlock prevents unauthorised operation and secures the device in place when the breaker is in the off position.

Code	Description
MG29370	Merlin Gerin toggle attachment

SAFETY EQUIPMENT

- (LOTO) Lockout Tagout Safety Products

Starter Circuit Breaker Lockout Kit

This is an ideal starter circuit breaker lockout kit for individual use. It contains 5 individual breaker lockouts, a single safety tag and a TT38RED padlock keyed to differ. All packed in a mini pouch with belt loop which allows the products to be carried at all times.

Code	Description
SCBKIT	Starter MCB Lockout/Tagout kit

Intermediate Circuit Breaker Lockout Kit

This circuit breaker/isolator lockout kit is our best seller and is ideal for electricians and engineers who regularly work on various applications where power is isolated via circuit breakers or electrical isolators.

Designed for use in today's industrial applications this kit includes twelve different types of breaker lockout, models CB01, CB02, CB03, CB04, CB05, CB06, CB07, CB08, CB09, CB12, CB16 and UCL1 which will cover the majority of the applications in today's industry.

Also included is our most popular MLH1 stainless steel lockout hasp, two individual TT38RED padlocks and a pack of our RPT29AR re-usable 'Do Not Operate' tags, along with a non-permanent marker and ties for clear lockout identification.

All supplied as a kit in a strong rigid plastic storage container.

Code	Description
ECBKIT	Intermediate MCB Lockout/Tagout kit

Domestic Circuit Breaker Lockout Kit

This circuit breaker/isolator lockout kit is aimed at the domestic electrician who regularly works on various applications where power is isolated via circuit breakers or electrical isolators.

The kit includes six different types of breaker lockout, models CB05, CB09, CB12, CB13, CB16 and UCL1 which cover the majority of domestic applications, usually breakers up to 63 amp.

Also included in the kit is our MLH1 multiple lockout device to allow more than one padlock to be applied at any point of isolation, a TT38RED individual padlock, and a pack of LSE10T 'Do Not Operate' tags with marker pen for clear lockout identification.

All supplied as a kit in a strong canvas bag which can be worn around the waist allowing contents to be carried at all times.

Code	Description
DCBKIT	Domestic MCB Lockout/Tagout kit

Ultimate Circuit Breaker Lockout Kit

This circuit breaker/isolator lockout kit is the ultimate for locking off circuit breakers in domestic/industrial applications.

It contains one each of the devices, models CB01, CB02, CB03, CB04, CB05, CB06, CB07, CB08, CB09, CB10, CB11, CB12, CB13, CB14, CB15, CB16, UCL1, UCL2, UCL5, S2391, S2390, CLT1 & CLT2.

Also included are two of our MLH1 lockout hasps, four individual TT38RED padlocks and a pack of LSE10T 'Do Not Operate' tags with pen.

Ideal for group use or just to cover every type of MCB/toggle switch application in today's market.

The most comprehensive breaker lockout kit available to cover all your breakers

SAFETY EQUIPMENT

- (LOTO) Lockout Tagout Safety Products

KITO

A great starter kit, ideal for individuals, this kit contains equipment for locking off small ball valves, gate valves, pneumatic equipment, circuit breakers, toggle switches and electrical isolators.

Kit includes:

- 1 x SBOX02 Storage box
- 1 x BS01 Ball valve lockout
- 1 x CLKIT Cable lockout
- 1 x MLH1 Lockout hasp
- 2 x TT38RED Individual padlocks
- 1 x LSE10T Pack of 10 safety tags
- 1 x RWPT01 Non-permanent marker
- 1 x BS10 Adjustable gate valve lockout
- 1 x BS11 Pneumatic lockout
- 1 x CB05, CB12 and CB16 circuit breaker lockout

Code	Description
KITO	Starter lockout kit box and contents

KIT1

A great intermediate kit, ideal for individuals or small groups/departments. This kit contains equipment for locking off ball valves, gate valves, pneumatic equipment, circuit breakers, toggle switches, electrical isolators and portable equipment.

Kit includes:

- 1 x SBOX02 Storage box
- 1 x BS01 Ball valve lockout
- 1 x BS02 Ball valve lockout
- 1 x CLKIT Cable lockout
- 2 x MLH1 Lockout hasp
- 4 x TT38RED Individual padlocks
- 3 x LSE10T Pack of 10 safety tags
- 1 x V480 Gate valve lockout
- 1 x V481 Gate valve lockout
- 1 x V482 Gate valve lockout
- 1 x BS11 Pneumatic lockout
- 1 x YSLB1 Lockout bag
- 1 x CB05, CB12 and CB16 Circuit breaker lockout
- 1 x RWPT01 Non-permanent marker

Code	Description
KIT1	Intermediate lockout kit box and contents

LOTO Equipment Storage Bag

Storage bag supplied empty so you can create your own custom kits, tailored to your specific requirements.

BAG22

Code	Description
BAG22	LOTO equipment storage bag

Lockout/Tagout Safety Equipment Box Holder

Wall mounted, ideal for keeping your lockout kit nearby and in a prominent position. Holds SBOX02 Medium lockout box, KITO and KIT1.

Size: 450mm H x 450mm W

Kit box not included

Code	Description
LSE320	Lockout/tagout equipment box holder

KIT2

A great comprehensive kit ideal for groups/departments. This kit contains equipment for locking off ball valves, gate valves, pneumatic equipment, circuit breakers, toggle switches, electrical isolators, portable equipment and any device that utilises the popular IEC60320 input connector.

Kit includes:

- 1 x SBOX03 Storage box
- 1 x BS01 Ball valve lockout
- 1 x BS02 Ball valve lockout
- 2 x CLKIT Cable lockout
- 4 x MLH1 Lockout hasp
- 8 x TT38RED Individual padlocks
- 1 x Each circuit breaker lockout CB01 to CB16, UCL1, UCL2, UCL5, S2391, S2390
- 1 x CLT1, CLT2 Lockout cleats
- 3 x BS11 Pneumatic lockout
- 1 x YSLB1 Lockout bag
- 1 x LP770 Plug lockout
- 1 x IEC Connector lockout
- 1 x V480 Gate valve lockout
- 1 x V481 Gate valve lockout
- 1 x V482 Gate valve lockout
- 3 x LSE10T Pack of 10 safety tags
- 1 x RWPT01 Non-permanent marker

SAFETY EQUIPMENT

- (LOTO) Lockout Tags And Tag Stations

Two Part Isolation Tag

Our 2 part isolation tag is ideal for more complex isolations where traceability is important. After parts 1 and 2 are filled in, part 1 is attached to the isolation point. Part 2 is detached and returned back to the responsible person as confirmation of isolation. Both parts of the tag have areas for tag and permit numbers which can be entered onto the permit to work, again to aid traceability.

Once the job is complete, both parts can be filed with the permit as a long term record of the work. Alternatively if used with a dry wipe marker, both parts can be cleaned ready for re-use.

Parts 1 and 2 are pre-scored to allow easy separation by hand.

Combined size: 265mm x 100mm

Supplied in packs of 50

Material: PVC

Pens
Ideal for writing on tags and padlock tags. Available as permanent or non-permanent.

Code	Description
ISTAG50	Pack of 50 Isolation Tags
RWPT01	Water based non-permanent pen
RWPT02	Oil based permanent pen

Tag Station

Size: 600mm H x 500mm W

Ideal for keeping all your safety tags in a central location, accessible to everybody.

- ◆ Maximum tag size 200mm x 100mm
- ◆ 8 clear acrylic tag compartments
- ◆ Supplied with or without contents.

Contents included are:

- 1 x RLOT1 (pack 100)
- 1 x RLOT2 (pack 100)
- 1 x RLOT3 (pack 100)
- 1 x RLOT4 (pack 100)
- 1 x RLOT5 (pack 100)
- 1 x RLOT6 (pack 100)
- 1 x RLOT7 (pack 100)
- 1 x RWPT01 Marker pen.

5-Lock Safety Lockout Boxes

This safety lockout box has 5 individually keyed locks to facilitate group lockout. Each worker removes and retains their key which ensures that access to the contents of the lockout box cannot be released until each of the keys has been returned by its respective keeper.

- ◆ Made of heavy duty grey coated steel
- ◆ All keys are 'keyed to differ'
- ◆ Internal steel shelf and 3 hooks
- ◆ Hole punched flange top and bottom for additional padlocks
- ◆ Dimensions: 230mm H x 155mm W x 90mm D

Optional Customised Self-adhesive Labelling

Personalise your 5-lock lockout box with custom text and/or logo. Label design is shown left, just change the text and/or add logo (specify text/supply logo when ordering).

Supplied with 5 write-on key tags.

Padlocks not included

Code	Description
EK5LO	5-lock safety lockbox without label
EK5LAB	Self-adhesive label fitted to lockbox plus 5 write-on key tags

Wall Mounted Group Lockout Box

Manufactured from high quality impact resistant plexiglass, these lockout boxes are ideal for group lockout situations.

Complete with 16 key hangers and a clear tamper proof sliding cover which allows the contents to be easily viewed/checked.

Code	Description
GLB1	Wall mounted group lockout box

Single Work Permit Station

Size: 560mm H x 740mm W

Complete with the following:

- 1 x GLB1 Lockout box
 - 1 x RRWP1 Permit to work wallet
- Permit documents and padlocks not included

Code	Description
LSE312FS	Single work permit station

Group Lockout Station

Size: 1220mm H x 1220mm W

Complete with the following:

- 3 x GLB1 Lockout boxes
- 3 x RRWP1 Permit to work wallets
- 22 x TT38RED Padlocks
- 9 x LSE10T

Permit documents not included

Code	Description
LSE313FS	Group lockout station

Permit To Work Forms Help Promote Safe Work Systems

The process for planning, organising, controlling and reviewing work activities should form an integral part of every Health & Safety Management System. Before all lockout and maintenance work is undertaken a risk assessment should be conducted and a permit issued.

The permit should specify work to be done, precautions to be taken and ensure that all possible hazards are considered. It is used when normal safe systems need to be removed for maintenance or if new hazards could be caused by work.

A4 Permit to Work Forms

These permits include a section on Risk Assessment which is required under the Management of Health & Safety at Work and other regulations.

Permits are 3-part (top plus 2 carbon copies) with a convenient card backing, which is also an A4 sign.

Sold as packs of 10 of one type.

RWP04
Electrical Work Permit

RRWP1

A4+ Permit Document Wallet

Provides ultimate protection and ease of viewing of permits or documents at the point of use.

- ◆ UV and moisture resistant transparent plastic.
- ◆ Easy access side-zip closure from top to bottom.

Code	Description
RRWP1	Permit document wallet

WEEE Regulation Labels

The Waste Electrical and Electronic Equipment Directive (WEEE) aims to encourage the reuse and recycling of electrical equipment. All electrical equipment put onto the market in the EU has to be labelled to conform to the directive.

- ◆ Designed and manufactured to BS EN 50419.
- ◆ Extremely durable remaining intact and legible for the life of the equipment.
- ◆ Two styles: flat self-adhesive or a cable wrap-around self-adhesive RCA01AJ.
- ◆ Supplied in packs of 250.

Code	Description
RWRL1	13x10mm flat label
RWRL2	20x15mm flat label
RCA01AJ	90x30mm cable label

Plug Tab

Use this plug tab to notify people that a plug socket or appliance must remain on.

- ◆ An extremely simple, safe and low cost device.
- ◆ It can be used wherever a 13 amp main plug is connected to a socket.
- ◆ Made from insulating material.
- ◆ Supplied in packs of 25.

Code
RPLG1

Photovoltaic 'PV' Labels

Photovoltaic 'PV' Labels available in high grade self adhesive vinyl.

Supplied individually or in packs of 250.

PV Array d.c. Junction Box. **Danger** - contains live parts during daylight.

25mm x 75mm VC1

Do not disconnect d.c. plugs and sockets under load - turn off a.c. supply first.

25mm x 75mm VC2

PV Array d.c. Isolator. **Danger** - contains live parts during daylight.

25mm x 75mm VC3

Inverter - Isolate a.c. and d.c. before carrying out work.

25mm x 75mm VC4

PV system - main a.c. Isolator.

25mm x 75mm VC5

WARNING Dual Supply

Do not work on this equipment until it is isolated from both mains and on-site generation supplies

Isolate on-site generator at _____
Isolate mains supply at _____

Electrical Wiring Regulations

An amendment to BS 7671:2001 (The IEE Wiring Regulations) states that new cable core colours must be used for all fixed wiring in electrical installations in the UK.

The poster (right) explains the colour changes in more detail.

The notice (below) must be fixed at the distribution board or consumer unit.

Caution

This installation has wiring colours to two versions of BS 7671. Great care should be taken before undertaking extension, alteration or repair that all conductors are correctly identified.

This notice is available in a range of sizes and materials to suit your requirements. See below.

PESDS: (PERMANENT ELECTRICAL SAFETY DEVICES)

GracePorts® are a foundational tool many facilities use across the globe to keep voltage away from people. GracePorts are fully customizable communication ports that allow workers to access control panels safely and conveniently through closed doors.

The Voltage Test Station (VTS) takes the guesswork out of verifying electrical energy and enhances your work place safety and productivity.

- The Voltage Test Station (VTS) is a Permanent
- Electrical Safety Device that allows workers to quickly and safely validate zero electrical energy from outside the electrical enclosure.
- The VTS combines a voltage indicator and test points to confidently verify zero electrical energy.
- Provides a safer and more productive method of performing LOTO, while exceeding NFPA 70E and meeting the OSHA energy isolation principle.
- Lockable housings add an additional layer of protection by allowing authorized personnel to safely access the VTS.

The PPE You Don't Wear/MAXIMIZE SAFETY MINIMIZE RISK!

Mount your SafeSide® PESDs exactly how and where you want with our accessories including door-mount kits and labels.

VOLTAGE INDICATOR WITH SOLID-ON LEDS OR FLASHING LEDS

SafeSide® thru-door voltage indicators provide electrical safety information while the panel doors are safely closed. This “one-size-fits-all” solution detects 3-phase AC or DC voltage from 40-750VAC/30-1000VDC. The encapsulated construction and redundant circuit design means rugged reliability. SafeSide® products are available with flashing LEDs (R-3W) and non-flashing LEDs (R-3W-SR).

Safer Lock-Out Tag-Out (LOTO)

Keeping personnel away from live voltage is foundational to electrical safety. Electrical safety demands a precise answer to the question ‘Is voltage present?’. Thru-door voltage indicators provide visibility of voltage from outside the enclosure without exposing personnel to voltage.

More Productivity in Mechanical LOTO

Workers performing mechanical LOTO must isolate electrical energy. An externally-mounted voltage detector provides a means to check voltage inside an electrical panel. Without a voltage indicator, a mechanic performing mechanical LOTO would be required to work in tandem with an electrician using a voltmeter to physically verify voltage inside an electrical panel. In this case, the electrician is exposed to voltage. With thru-door voltage detectors, the mechanic can verify zero electrical energy without any exposure to voltage.

Reduced Voltage Exposure and Arc Flash Risk

Voltage is the common denominator in an electrical accident or an arc flash; no voltage means no accident, no arc flash. While performing electrical LOTO with a thru-door voltage detector installed, the electrician can pre-check the internal voltage state without opening the enclosure. Next, the electrician should replicate a zero voltage reading with his voltmeter as per NFPA 70e 120.1(5). This low-cost, redundant voltage-verification task reduces arc flash risk and increases electrical safety for workers.

VOLTAGE INDICATOR WITH SOLID-ON LEDS OR FLASHING LEDS

FEATURES:

- Redundant Circuitry / Long Life LED's
- 40-750VAC / 30-1000VDC / 35-600VAC 1Ø Potted
- Construction with 6' Leads
- Phase Insensitive
- 30mm Pushbutton or Pilot Hole
- High Surge Immunity
- UL Listed, Type 4X, 12, 13

APPLICATIONS:

- Circuit Breaker Disconnects - No Visible Blades
- High Energy Panels (NFPA 70E Category 3 or 4)
- Frequently Accessed Panels
- Mechanical LOTO: Indicating Zero Energy
- Panels with Multiple Power Sources

Three Phase 40-750VAC/30-1000VDC UL-Listed Voltage Indicator for Type 4X/12/13 for 30mm Mounting

INTRODUCING FLEX-MOUNT VOLTAGE INDICATOR

Flex-Mount voltage indicator is a Permanent Electrical Safety Device (PESD) that conveniently mounts onto any electrical equipment. This 3-phase voltage indicator uses redundant, longlife LEDs (flashing or non-flashing options available) to provide a visual representation of energy presence with the flexibility of being mounted anywhere.....

(R-3MT Kit)

Safe-Test Point (R-3MT with Dust Cover + Label) A Permanent Electrical Safety Device (PESD) that allows workers a safer way to verify presence or absence of voltage from outside the electrical cabinet.

Thru-Door Test Point

Adding PESD'S reduces the risk of Arc Flash

SAFETY EQUIPMENT

- Continuous Temperature Monitoring

(HSM) HOT SPOT MONITOR

(HSM) is a non-conductive temperature monitoring device that identifies potential hot spots and enables user to predict the failures in an electrical equipment. Identifying faults before they occur saves money when unplanned outages, service interruptions, and equipment failures are avoided. Design and communication flexibility allows the HSM to be used as either stand-alone or fully integrated into a plant wide information system. Plant wide integration is made simple when the device is connected via MODBUS TCP I/P or Ethernet I/P to the facility's

TECHNICAL SPECIFICATIONS

Varying fiber lengths and lug sizes available. See Accessories section in the right.

ARC FLASH RELAYS

ARC FLASH RELAYS

Code	Description
AF0100-00	ARC FLASH RELAY 100- 240V AC/DC, 24 - 48V DC
AF0500-00	ARC FLASH RELAY 100- 240V AC/DC, 24 - 48V DC 4 INPUTS
PGR-8800	ARC FLASH RELAY 100- 240V AC/DC, 24 - 48V DC 6 INPUTS
PGA-LS10	10 POINT SENSOR
PGA-LS20	20 POINT SENSOR
PGA-LS30	30 POINT SENSOR
MP8000	"MOTOR PROTECTION RELAY (Motor protection electronic overload relays, fully Programmable via Bluetooth®)"

Fast Arc-Flash Detection

Circuit breakers (CBs) or overcurrent protection devices (OCPDs) alone do not provide optimal protection for your personnel and equipment. The Littelfuse Arc-Flash Relays rapidly detect an arc flash and send a trip signal to interrupt power.

PGR-8800 Arc-Flash Relay

Simple Plug & Play Installation and Maintenance

The **PGR-8800** and **AF0500** Arc-Flash Relays and sensors are easily retrofitted into existing switchgear or pre-installed in new equipment with little or no configuration. Even elaborate systems only take minutes to configure using the relays' built-in USB interface software, and the innovative digital inputs/outputs on the AF0500.

- Improve sustainability and life of electrical equipment
- Lower the Hazard Risk Category (HRC) of the equipment
- Provide protection against equipment damage and potential injury to personnel
- Easily installed without changes to existing layout
- Flexible sensor configuration for any application
- No additional software is required

Installs up to 8X Faster than Competition!

Installing a Littelfuse arc-flash relay can lower your HRC rating.

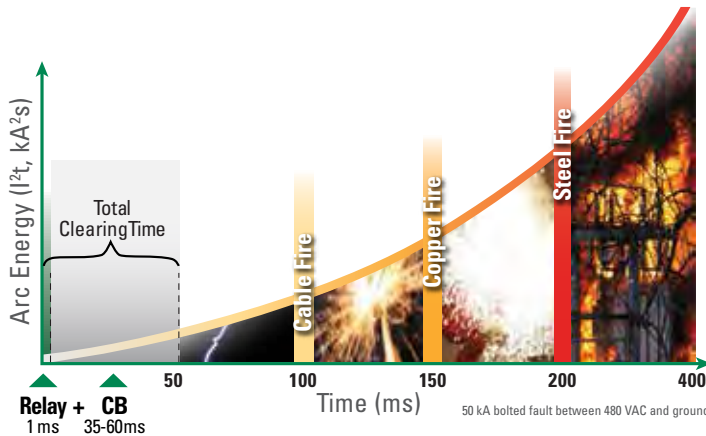

in Less Than 1 ms

to Minimize Damage

AF0500 Arc-Flash Relay

Damage Caused By Arc-Flash Incident

Arc-Flash Relays use a 125- μ s light-sampling scheme in combination with an ultra-fast IGBT output to be able to detect a developing arc flash and send a trip signal to a circuit breaker in less than 1 ms.

Superior and Robust Sensor Design

PGA-LS10

Point Light Sensor

Line-of-sight light sensor detects an arc as small as 3 kA in a 2-meter half-sphere radius.

- Visual LED indication for "Ready" or "Tripped" state to assist with fault location
- Robust sensor design can withstand a detected arc-flash event
- Sensor can be installed up to 50 m (164 ft) away from relay; electrical cable can be cut and easily re-terminated in the field

PGA-LS20/PGA-LS30

Fiber-Optic Light Sensor

The 360° light sensor detects light throughout the entire length of the fiber. Ideal to protect bus bars, multiple compartment installations like motor control centers, or areas with many obstructions.

- Visual LED indication for "Ready" or "Tripped" state to assist with fault location
- Durable resin fiber material allows small bending radius (>5 cm) and greater flexibility without breaking
- Ready to install from the factory, no need to terminate in the field or polish as with glass fiber
- Fiber sensors can be installed in locations up to 50 m (164 ft) away from relay; electrical cable can be cut and easily re-terminated in the field

Sensor Placement Recommendations

Generally, it is recommended to mount 1 or 2 sensors per cubicle to cover all horizontal and vertical bus bars, breaker compartments, drawers, and anywhere that there is potential for an arc fault. Threading a fiber-optic sensor through the cabinets and in areas where point-sensor coverage is uncertain results in complete coverage and an added level of protection. Even if policy is to only work on de-energized systems, all maintenance areas should be monitored for arc flash to prevent potential damage and additional cost. For more information, download the Installation Guide PF711 from Littelfuse.com/ArcFlash.

- ★ Arc Flash
- Fiber-Optic Sensor
- Point Sensors

Scenario with point sensor placement on the wall of each compartment. Arc detection area for each sensor is shown in green shade. In this case, both Point Sensor 1 and the Fiber-Optic Sensor detected the flash as it was within their viewing area (shown in orange).

Application Example PGR-8800

Fiber-Optic Sensor

PGA-LS20 and PGA-LS30

Detects light 360° along the entire length of the exposed fiber. Sensor is pre-wired with 10 m (expandable to 50 m) of electrical cable and a plug-in terminal block.

Point Sensor

PGA-LS10

Detects light at 180° angle in line of sight. Sensor is pre-wired with 10 m (expandable to 50 m) of electrical cable and a plug-in terminal block.

Application Example AF0500

Breaker Connection

Sends trip signal to breaker trip coil (undervoltage or shunt trip) to interrupt power. Ability to trip upstream breaker if local breaker fails.

Current Transformers

Optional, PGR-8800 only

Measures current to help eliminate nuisance trips.

Reliable Operation with Built-In Redundancies

When you are entrusting a safety device to protect equipment from catastrophic damage, it is important to know that it will operate as expected. Littelfuse Arc-Flash Relays do this by having built-in redundancies and health monitors, making maintenance and installation tasks faster, more efficient and helping to minimize downtime.

	PGR-8800	AF0500
 Redundant Internal Trip Path <ul style="list-style-type: none"> Two internal trip paths for added reliability—if the microprocessor trip path fails, the backup analog trip path will seamlessly take over, sending an alarm notification to operators Backup analog trip path initializes very quickly upon power up, ensuring protection is enabled while energizing the system when hazard risk is higher 	✓	✓
 Health Monitoring <ul style="list-style-type: none"> Continuously monitors connection to trip coil to ensure path is intact LED indication of sensors' "Ready" or "Tripped" status on sensor and relay Sensors are durable enough to withstand a detected arc-flash event 	✓	✓
 Reliable Light Detection <ul style="list-style-type: none"> Two types of light sensors (point and fiber-optic) for different applications Adjustable light-level and wide-angle detection add flexibility Durable and flexible sensor design eliminates breakage and re-work 	✓	✓

Trip Coil Outputs	<1 ms; IGBT switch <u>Current Rating:</u> 750 mA cont. 20 A for 2 s 10 A for 5 s	
	<u>Voltage Rating:</u>	24 to 300 Vac 24 to 300 Vdc
Communications	Ethernet, 2 ports with internal Ethernet switch, Modbus® TCP	
System Expansion	Unlimited	
Sensors	4 per unit	
Approvals	CE, UL Listed (UL508), C-Tick	
Warranty	5 years	
Mounting	Surface, DIN (with optional D0050 adapter clips)	

PGA-LS20/LS30 Fiber-Optic Sensors

Type	Fiber-optic light sensor
Detection Radius	360° Line-of-sight light sensor
Trip Status LED	Displays "tripped" state on each sensor
Health Status LED	Displays "ready" state on each sensor
Sensor Length	PGA-LS20: 8 m (26.2 ft) active; 10 m (32.8 ft) total PGA-LS30: 18 m (59 ft) active; 20 m (66 ft) total
Electrical Cable	10 m (32.8 ft) included, expandable to 50 m (164 ft)

PGA-1100 Diode Logic Unit

Type	Diode Logic Unit
Diodes	1000V reverse voltage, 3 A continuous, 25 A for 1 second
Certification	CE
Dimensions	H 70 mm (2.76") W 20 mm (5.9") D 80 mm

SAFETY EQUIPMENT

- Monitoring Devices for Conveyor Systems

PULL ROPE EMERGENCY STOP SWITCHES

To stop conveyors at any location in emergencies in accordance to EN 620.

Description

- Enclosures in aluminium, plastic or cast iron
- Uni- and bidirectional installation of pull rope
- ATEX  II 2D-II 3D
- Enhanced temperature range to - 40°C (- 40°F)
- Two-wire-fieldbus connection

ACCESSORIES FOR STOP SWITCHES

Required for assembling a pull rope system for Emergency Stop Switches

Description

- Pull rope of 3 and 5mm diameter with red PVC Coating
- Tension springs, turnbuckles and rope clamps
- Rope support eyebolts and accessories
- Corrosion-resistant materials available

BELT MISALIGNMENT SWITCHES

Protect equipment by shutting down the conveyor when the belt mistracks

Description

- enclosures in aluminium, plastic or cast iron
- pre-warning; switch off; latching / catch mechanism
- ATEX  II 2D-II 3D
- enhanced temperature range to - 40°C (- 40°F)
- two-wire-fieldbus connection

**PRICES AVAILABLE
ON REQUEST.**

ROBUST LIMIT SWITCHES

For position monitoring

Description

- Enclosures in aluminium, plastic or cast iron
- Various actuating levers, rods, trollers
- ATEX  II 2D-II 3D

Speed Monitors

For monitoring the speed and rotation of conveyors

Description

- Pulse generators
- Low-speed-detection, direction of rotation
- Belt driven speed monitors
- ATEX  II 2D-II 3D

Misalignment Switches for Bucket Elevators

Contact free monitoring of bucket travel

Description

- For aluminium, mild steel and stainless steel
- Switching distance up to 70mm

Belt Monitoring

For detection of belt breakage

Description

- Separable switches
- Installation material

**PRICES AVAILABLE
ON REQUEST.**

SAFETY EQUIPMENT - Interlock Systems

• Safety Interlocks For All Industries (PRICES AVAILABLE ON REQUEST)

Safety Interlocks are suitable for applications across a wide industrial base including power generation and distribution, steel, automotive, recycling, building materials, pharma, food and beverage, robotics and palletisers.

Its extensive product offering and interlocking experience allows us to provide unique solutions for all safeguarding applications.

It regularly creates bespoke solutions, often by customising its standard products.

tGard

tGard offers total integration of control and safety. This is Fortress' brand new product that is customisable as standard.

Its unique design allows the configuration of safety interlock switches, trapped key interlocks and machine control stations or any configuration of all three.

tGard elements are housed in a metal body to create a simple and robust safety system.

mGard

mGard is the premier range of modular robust trapped key interlocks for heavy duty applications. Trapped key interlocking is a tried and tested method of mechanically safeguarding dangerous machines and hazardous processes, and is suitable for use up to SIL 3 (EN/IEC 62061), Category 4 and PLe (EN/ISO 13849-1).

It is called "Trapped Key" as it works by releasing and trapping keys in a predetermined sequence. After the control or power has been isolated, a key is released that can be used to grant access to individual or multiple doors.

amGardpro is the ultimate range of modular safety gate switch interlocks for heavy duty applications.

Its unique modular construction allows easy configuration and provides total electro-mechanical solutions for practically any safeguarding application up to SIL3 (EN/IEC 60261) Category 4 and PLe (EN/ISO 13849-1).

amGardS40 is a range of safety interlock switches, manufactured in 316 stainless steel. The range is modular in design, allowing a wide range of safety interlock switches to be configured to suit many industrial applications, including:

- Solenoid Locking Safety Switches
- Non Solenoid Tongue Switches, all with or without machine control

The range is supplied in enclosures sealed to IP69K making it suitable to be pressure washed at high temperatures and has a retention force of 10,000N, so it is ideal for ensuring guard doors are held closed until machines and/or processes are in a safe condition.

amGardnct is a range of safety switches that utilise non contact technology.

Designed with IP69K housings, these robust, coded, non contact, safety proximity switches are long lasting and virtually maintenance free with a high level of misalignment making them ideal for guarding applications across a range of industries.

SAFETY EQUIPMENT - Interlock Systems

• Safety Interlocks For All Industries

tGard is the new innovative approach to controlling access to hazardous machinery and equipment. It is a compact metal bodied system that enables the configuration of various safety products including electrical safety gate switches (with or without guard locking), mechanical trapped key interlocks, and electrical operator controls, either as separate devices or integrated into one device.

tGard offers “a customised safety solution, as standard” and is defined by a range of tGard elements, including selector switches, safety switches (solenoid and non solenoid), personnel keys, emergency release, push buttons, eStops, indicator lamps and a choice of operating handles for both hinged and sliding guard doors. These elements are simply selected and then assembled into a robust housing, suitable for mounting onto machine guarding, providing the user with an exact configuration specific to the application.

tGard is quick and easy to install and can be mounted directly onto a flat surface, doors or extruded aluminium profiles without the need for mounting plates or brackets. It is IP65 as standard and has been designed to be fully compliant with the new machinery safety standards.

Customised Safety Solutions as Standard

- Combines interlocking and control in one device
- Simply Robust - All metal housing.
- Customisable - Select exact elements required.
- Future proof for future element expansion.
- Easy and fast to install.
- Quick Disconnects as standard (selfwire option available).
- Mounts directly to extruded aluminium frame.
- Fast on site handing change.
- Allows for door misalignment
- Compliant with all key standards.
 - EN ISO 14119.
 - EN ISO 13849 1 & 2
- Configured products include:
 - Safety Gate Switches.
 - Trapped Key Interlocks.
 - Operator Control.

mGard is the premier range of modular robust trapped key interlocks for heavy duty applications. Trapped key interlocking is a tried and tested method of mechanically safeguarding dangerous machines and hazardous processes, and is suitable for use up to SIL3 (EN/IEC 62061) Category 4 and PLe (EN/ISO 13849-1).

It is called "Trapped Key" as it works by releasing and trapping keys in a predetermined sequence. After the control or power has been isolated, a key is released that can be used to grant access to individual or multiple doors.

The principles of trapped key technology apply to all industries where it is essential that all energy sources are isolated before gaining access to machinery. Almost all safety issues can simply be solved by selecting the required products in order of the steps shown on this page.

SE-CLIN-A02022

Power/Control Isolation

Identify the energy sources to be isolated and/or any hazard that cannot immediately be isolated such as; heat, pressure, radiation or machine rundown time

Power isolation

- Mechanical Bolt Interlock
- Bolt Interlock with Limit Switch
- Bolt Interlock with Switch
- Breaker Locks

All Fortress Interlocks rotary switches have European, Canadian, Chinese and North American approvals.

Control isolation

- Key Switches
- Solenoid Controlled Key Switch
- ATEX Key Switch
- ATEX Solenoid Controlled Key Switch
- Electronic Time Delay Unit
- Voltage Sensing Unit
- Knob and Key Operated Switch Control Unit

XM4-MLIN

Key Exchange

XMR4-CLIN

Key Exchange with Switch

Identify the type and number of access points.

- Key Exchange Units
- Key Exchange Units with Switch

Because of the modular arrangement of **mGard** both key exchange and door lock units can easily be extended with an *extension module (XMA)*, for instance when doors are added to the safeguarded area or machine.

The Fortress Trapped Key System allows the safeguarding of potentially hazardous areas without the need for wiring.

DM2-MLIS-S

Personal Safety Key

Door Locks & Actuators

DM1-CLIN

Identify the type of access point; part body or full body access doors with or without the use of personal safety keys (to prevent accidental lock in).

- Single Door Interlocks
- Multiple Door Interlocks
- Fixed actuator
- Handle operated actuator
- Spring loaded handle operated actuator
- Self aligning actuator
- Compressible actuator

SAFETY EQUIPMENT - Interlock Systems

• Safety Interlocks For All Industries

is the ultimate range of modular safety gate switch interlocks, for heavy duty applications. Its unique modular construction allows easy configuration and provides total electro-mechanical solutions for practically any safeguarding application up to SIL3 (EN/IEC 62061), Category 4 and PLe (EN/ISO 13849-1).

With its unrivalled design concept, amGard^{pro} offers a range of fully integrated safety interlocks, including solenoid and non-solenoid safety switches complete with a host of additional options including key control modules, emergency release, redundant sensors, lock out/tag out and push buttons, e-stops and indication lights for enhanced functionality. The robust construction of this range makes it ideal for use in a wide range of industrial applications when safety, strength and reliability are of paramount importance.

The amGard^{pro} system replaces all adaptations normally fitted within a guarding system, such that additional hardware like door catches, actuators, closing mechanisms, internal mechanisms, key functions including authorised access and deadlocks may be no longer needed. All of these separate functions can be incorporated into amGard^{pro} configurations, resulting in the most flexible safety interlock solution available for today's industrial environment.

STAINLESS STEEL MODULAR GATE SWITCHES - AMGARDS40

amGardS40 is the latest range of safety interlock switches from Fortress Interlocks. Manufactured in 316 stainless steel, the range is modular in design, allowing a wide range of safety interlock switches to be configured to suit many industrial applications. The choice of configurations include:

- Solenoid Locking Safety Switches
- Solenoid Locking Safety Switches with internal release
- Solenoid Locking Safety Switches with “safety keys” (for personnel protection)
- Solenoid Locking Safety Switches with machine control
- Non Solenoid Tongue Switches
- Non Solenoid Tongue Switches with machine control
- Mechanical Trapped Key Interlocks
- Machine Control Stations

The range is supplied in enclosures sealed to IP69K making it suitable to be pressure washed at high temperatures and has a retention force of 10,000N (greatest on the market) so it is ideal for ensuring guard doors are held closed until machines and/or processes are in a safe condition. Each module has a slim body design of 40mm so that it can be easily fitted to 50mm guarding sections or areas where space is limited.

The rugged design and strength capability makes the S40 range an ideal choice for applications in the Food & Beverage, Pharmaceutical, Chemical, and Construction Materials industries.

The graphic below shows the modules currently available in the range.

amGardS40 Range						
	S40 Slidebar	S40 Hinged Handle	S40 Tongue Actuator		S40 Cap	S40 Slimline Head
Actuators				Head Modules		
Adaptors	S40 IR Adaptor 	S40 E Adaptor 	S40 Lock Adaptor

proNet - ProfiNet / Profisafe communications module for amGardpro

Fortress Interlocks has 40 years' experience manufacturing safety interlocks and over that time has developed products to keep pace with and shape the development of safety practices. One facet of this is the interlocks interface to a systems control system; we see the first step back in 1992 when Fortress introduced its wired at gate solution amGard.

Technology has changed considerably since then. With advances in PLC technology, software and communication has become prolific throughout factories and automation. Standards like EN61508 and its derivatives have now been developed to allow these advances to be carried into safety applications. In line with these developments, Fortress is able to communicate the state of its device in a range of ways, via hardwiring, field buses, (like AS-i Safety at Work) and is now proud to add its proNet, industrial Ethernet communications to its range. Using the ProfiNet protocol and its extension Profisafe the proNet module integrates easily into the amGardpro range. This integration provides a range of modular solenoid gate switches that have all of the configurability of amGardpro with the added benefit of reduced installation cost, easier maintenance and greater availability of data, for improved diagnostics.

Non Contact Switches

Non-contact safety switches are interlocking devices that are designed to protect people, industry and productivity.

Non-contact safety switches are ideal for use in applications where precise guidance of guards is difficult. Due to the design they are extremely long-lasting devices that require minimal maintenance. In addition they are resistant to shock and vibrations and offer a high level of prevention against tampering.

Fortress have developed the amGardnct, a coded non-contact, safety, proximity switch in a robust package, featuring:

- Stainless Steel IP69K housing, ideal for food, beverage and pharmaceutical environments or anywhere hygiene or robustness are paramount.
- PLe Cat 4/SIL3 safety rating.
- Can be used as a coded interlock in accordance with EN14119.
- Based on solid state Hall Effect sensors that do not suffer from vibration and contact bounce.
- Copes with a very high level of misalignment
- Integrated electronics that monitors for faults and ensure the safety relay does not enter a fault state, irrelevant of the approach direction.
- Local user indication.
- Monitor outputs for use in the control system.
- Available with a variety of termination options.

Circuit Breakers - Modular Component

When mounted on the front of the Circuit Breaker this lock allows or prevents switching of the breaker.

X-Guard Machine Guarding One system, 1000 advantages...

X-Guard is the number one machine guard that complies with the Machine Directive's new demands on permanent guards. With its wide range of standard components and accessories, X-Guard is guaranteed to cover all possible machine guard needs. We also have a new machine guard, X-Guard Contour, which is the first machine guard with round corners.

X-Guard development has been based on three main criteria: The system should be flexible, quick to assemble, and comply with all conceivable safety requirements and relevant machinery directives. The result was an incredibly intelligent system with a number of benefits which machine guards provide. These include:

- X-Guard has only one post bracket. Used on both corners and straight walls
- The post's have pre-stamped holes to ensure quick assembly
- X-Guard is available in 13 different section widths and 4 different heights
- Doors can be rotated to open right or left so this does not need to be decided when ordering (not X-lock)
- The attachment is pre-fitted to the wall section at the factory
- The spacing between the posts is the same for doors and fixed sections
- A door in the corner is standard, no additional fittings are required
- 20x30 mm section frame is our standard product
- X-Guard Lite is available as an option
- X-Guard is available with rounded corner panels called Contour
- X-Guard can be supplied with a bracket that allows the X-Tray cable rack to be easily fitted

FACILITY ELECTRICAL PROTECTION

RFE (REG FARRELL ENGINEERING LTD)

have for many years been market leaders in the industry when it comes to earthing/grounding, lightning and surge protection. We offer a complete solution to the IS EN62305 lightning protection standard which includes our unique erico system 3000 "dynasphere lightning protection system". For the wind energy industry, we provide a complete economic solution to your grounding and lightning protection requirements, from the initial risk assessment software, through to design, and finally a commissioning service.

For technical advice, support & design services please contact a member of our sales team sales@rfe.ie

RFE partner with the following high quality brands such as

TYPICAL PRODUCTS INCLUDE: 25 X 3 COPPER TAPE, SQUARE TAPE CLAMPS, TAPE CLIPS, TEST CLAMPS, COPPER BONDED EARTH RODS, ROD TO TAPE CLAMP, INSPECTION PITS, and GROUND ENHANCEMENT MATERIAL.

STATIC BONDING & GROUNDING

Bonding and grounding are very effective techniques for minimising the likelihood of ignition from static electricity. A bonding system connects various pieces of conductive equipment together to keep them at the same potential. Static sparking cannot take place between objects that are at the same potential. Grounding is a special form of bonding in which conductive equipment is connected to an earthing electrode or to the building grounding system in order to prevent sparking between conductive equipment or ground.

EARTH RESISTIVITY TESTING

As part of our lightning protection plan which incorporates lightning protection designs for buildings, open areas, we now offer an earth resistivity testing service. For the efficient performance of a lightning protection system it is essential that a low impedance ground be provided to facilitate the dissipation of the lightning energy into the ground.

As soil and soil conditions vary greatly from region to region, soil (earth) resistivity will also vary significantly. It is essential that an accurate soil reading is achieved. This will enable you to design the grounding system best suited for the soil condition.

Our earth resistivity service is priced on application.

ERITECH® Copperbonded Pointed Ground Rods

- A uniform copper thickness provides better corrosion resistance in most soil conditions. Copperbonded rods last longer, drive easier and will not crack.
- Copper exteriors, molecularly bonded to nickel-sealed high-strength steel cores, exceed the requirements of ANSI/UL® 467-1984 (ANSI C33.8-1972) and CSA®.
- Copper Coating: standard copper plating thickness exceeds UL and ANSI specs. of 0.254mm, conforms to KEMA 83C and EN50164-2 Norms.
- The rods exceed a tensile strength of 515,000 kPa and straightness tolerance of 8.3 x 10-4m/m.
- Extending rods may be extended with use of threadless couplers.

ERITECH® TYPE CC Threadless Couplings for Copperbonded Pointed Rods

- Enables ground rods to be driven deep quickly and easily without the risk of rod separation.
- Made of high-strength silicon bronze.
- Tapered so that when the rod is driven into the coupling, the two parts compress to form a conductive connection.

Type DH Tempered steel Driving Heads

Couplers

Earthrod Pigtail

ERITECH Copperbonded Sectional Ground Rods

- Copperbonded externally coupled ground rods have all the features of standard copperbonded rods plus cold-rolled threads at each end for joining with couplings.
- The cold-rolled threads of ground rods with their continuous unbroken grain flows are stronger than cut-threads.
- High-strength couplings are threaded bronze and chamfered at both ends for easy driving.
- Threaded coupling design allows for full contact of rod point with butt end of preceding rod. These high strength, corrosion-resistant couplings ensure low resistance copper-to-copper connections.

Couplers for threaded rods

Steel driving studs for sectional ground rods

ERITECH solid copper and stainless steel threaded ground rods

Type SCR (solid copper)

- C101 to comply with BS2874 for solid copper ground rods.
- For use in highly corrosive soil conditions.

Rod to Cable Lug (Split Clamps)

- Manufactured in Gunmetal (LG2) and Naval Brass to comply BS1400, CZ112, BS2874
- Rod to Cable Lug clamps (threaded and unthreaded)
- Permits easy connection of ground conductors to both threaded and unthreaded ground rods
- Type SSR (Stainless steel)
- BS 970 - (A2 grade)

ERITECH® Ground Rod Driver

This one tool enables driving of rods to ground level, without heavy sledge-hammers or ladders and without deforming the end of the rod. Heavy-duty steel construction provides robustness and excellent driving force, while the soft rubber ergonomic grip provides user comfort.

The ERITECH® Ground Rod Driver from ERICO® is the simple, effective and affordable way to install ground rods.

The ERITECH® Ground Rod Driver includes driver body with soft rubber grip, insert for driving rods to ground level, and retaining collar which holds insert in place during storage.

- Usable on all types of round ground rods: copperbonded, galvanized, stainless steel
- 14,2 mm (5/8") and 17,2 mm (3/4") inserts are interchangeable with standard driver body to enable easy driving of standard rods.
- The driver will not deform the end of the rod, making connection of the ground conductor quick and easy
- Integral insert prevents driver from slipping off the rod near ground level.
- Convenient retaining collar holds the insert in the tool when not in use.
- Self-contained and easy to store.
- Saves time and money and dramatically reduces risks of employee injury.

FACILITY ELECTRICAL PROTECTION - Earthing Equipment

ERITECH® Galvanized steel ground rods

- Zinc-coated exteriors are hot-dip galvanized for solid protection against corrosion.
- Surfaces are rigidly inspected to eliminate seams, slivers and other defects.

ERITECH® Type Cloverleaf profile European application only (Non-extensible)

- Galvanized thickness 150 µm according to UTE 66-400.
- Resistance: > 70 daN/mm²
- Supplied with fitted splice socket.

Type RG Round (Non-extensible)

- Resistance: > 70 daN/mm²
- Supplied with fitted splice socket.

ERITECH Type CG (X-Shaped Non-extensible)

- Steel quality DIN 17100
- Supplied with splice plate
- Compliant with DIN 48-452
- Zinc coating: minimum 55 µm, (average minimum 70 µm)
- Sections 50 x 50 x 3 and 50 x 50 x 5

ERITECH Type SG Round galvanized ground rods (Extensible)

- Steel quality DIN 17100
- Compliant with CEI 7/6
- Zinc coating: minimum 78 µm, (average minimum 86 µm)
- Resistance: > 70 daN/mm²

Driving Point

Driving Head

Driving Accessories for SG ground rods

- Steel quality DIN 17100

GROUND ENHANCEMENT MATERIAL (GEM)

Developed in 1992, GEM Ground Enhancement Material is a superior conductive material that solves your toughest grounding problems.

GEM improves grounding effectiveness regardless of soil conditions. It is the ideal material to use in areas of poor conductivity such as rocky ground, mountain tops and sandy soil.

GEM is also the answer in situations where ground rods can't be driven. Or

where limited land area makes adequate grounding difficult with conventional methods.

Once GEM is installed, it maintains its low resistance for the life of the project. GEM's performance is backed by rigorous independent tests and proven field experience.

GROUNDING RECEPTACLES

Meets BS1400

These receptacles provide earth connections for the frames of planes, ships, tankers trucks, etc. eliminating their electrostatic charge and obtaining equipotentiality with the surrounding earth.

Parts are copper alloy, connections to the earth circuit can be made with CADWELD[®].

FACILITY ELECTRICAL PROTECTION - Exothermic Welding

• Cadweld Plus

CADWELD PLUS – LEADING TECHNOLOGIES IN EXOTHERMIC WELDING

- Current carrying capacity equal to or greater than that of the conductor
- Withstand repeated fault currents without failing during operation
- Permanent, molecular bond that will not loosen or corrode, resulting in a connection with a lifetime equal to that of the installation
- Join copper to copper, copper to galvanized or plain steel, copper to copper clad steel, copper to bronze/ brass/ stainless steel, steel to steel, etc.
- No external power or heat source required
- Quality Assurance Inspection is easy and visual
- Minimal installation training required
- Exceed requirements of “IEEE® Std 837- Std. for Qualifying Permanent Connections Used In Substation Grounding”

The ultimate welded connection that will never loosen, corrode or increase in resistance.

CADWELD PLUS – LEADING TECHNOLOGIES IN EXOTHERMIC WELDING

4 Simple Steps for permanently Welded Electrical Connections

FACILITY ELECTRICAL PROTECTION - Lightning & Surge Protection for Wind Turbines

LIGHTNING & SURGE PROTECTION FOR WIND TURBINES

Graphic for demonstration purposes only

FACILITY ELECTRICAL PROTECTION

RFE have been involved in the lightning protection business for many years now offering products from leading international manufacturers ERICO , A.N. WALLIS and J.Propster. In cooperation with these companies RFE offer an expertise across a wide range of applications for Lightning Protection Design, Risk Assessment, Installation and Commissioning.

Using **dedicated software** our engineers can carry out an individual risk assessment to IS EN62305 for any type of installation and thereafter a complete design to the European standard or if required a design based on our unique ESE / Dynasphere lightning protection systems which can be seen on prestigious installations such as Farmleigh House in Dublin.

We offer advice on selection and installation of coordinated surge protection for all copper services entering or leaving your specific facility.

We carryout ground resistivity surveys and can address any poor soil conditions with the ERICO GEM product which Conforms to IEC 62561-7.

We provide both training and supply of the ERICO CADWELD Exothermically Welded Connection. These connections are specified by engineers and consultants for many industries and installed by contractors and site owners large and small all over the world. With Over 100,000,000 field-proven connections installed around the globe by very satisfied customers, the “ERICO CADWELD” name has become synonymous with “Exothermic Welding” from the classroom to the job site. ERICO CADWELD continues to maintain a reputation for electrically superior connections that will never loosen, break, or corrode in most environments.

Over the years we have worked on projects such as Intel, Microsoft, Luas and Roche Pharmaceuticals and together with our experience and highly qualified engineers can offer you an unrivalled package of product and support.

DEGREES OF PROTECTION

• Degree of protection of the electrical equipment up to 1000V a.c. and 1500V d.c.

IP X₁ X₂

according to IEC 529 (1989) and EN 60529 (1991)

X ₁	Protections of persons against contact with live parts. Protection of equipment against ingress of solid foreign bodies		
	CEE-symbol	Test	
0			None
1			Against access with hand and ingress of solid objects greater than 50 mm
2			Against access with finger and ingress of solid objects greater than 12 mm
3			Against access with tools and ingress of solid objects greater than 2.5 mm
4			Against access with wires of strips and ingress of solid objects greater than 1 mm
5			Complete protection against contact with live parts and ingress of harmful deposits of dust
6			Complete protection against contact with live parts and ingress of dust

IP X₁ X₂

according to IEC 529 (1989) and EN 60529 (1991)

X ₂	Protections against ingress of liquids		
	CEE-symbol	Test	
0			None
1			Against vertically falling drops
2			Against drops of falling liquid at an angle up to 15° from the vertical
3			Against water falling in rain at an angle up to 60° from the vertical
4			Against water splashed from any direction (over 360°)
5			Against water jets from any direction (over 360°)
6			Against water projected in powerful jets as from heavy seas
7			Against immersion in water under defined conditions of pressure and time
8			Against continuous submersion in water

DEGREES OF PROTECTION

Degree of protection of the electrical equipment up to 1000Va.c.and 1500V d.c.

After 10 strokes, the enclosure should show neither visible crack of damage that might jeopardize the protection degree IP X1 X2

Protection against external mechanical damage

X₃	According to NBN C20-001		
	Impact strength		
	Hammer Mass (kg)	Fall (m)	Impact energy (J)
0.5	M = 0.15 kg	h = 0.1 m	0.2
1	M = 0.15 kg	h = 0.15 m	0.3
1.5	M = 0.15 kg	h = 0.2 m	0.4
2	M = 0.15 kg	h = 0.25 m	0.5
3	M = 0.25 kg	h = 0.2 m	0.6
4	M = 0.5 kg	h = 0.2 m	1
5	M = 0.5 kg	h = 0.4 m	2
6	M = 1.5 kg	h = 0.27 m	4
7	M = 1.5 kg	h = 0.4 m	6
8	M = 5 kg	h = 0.2 m	10
9	M = 5 kg	h = 0.4 m	20
10	M = 15 kg	h = 0.235 m	35
11	M = 15 kg	h = 0.4 m	60

Protection against external mechanical damage

K	According to EN 50102		
	Impact strength		
	Hammer Mass (kg)	Fall (m)	Impact energy (J)
00	*	*	*
01	M = 0.2 kg	h = 75 mm	0.15
02	M = 0.2 kg	h = 100 mm	0.2
03	M = 0.2 kg	h = 150 mm	0.35
04	M = 0.2 kg	h = 250 mm	0.5
05	M = 0.2 kg	h = 350 mm	0.7
06	M = 0.5 kg	h = 200 mm	1
07	M = 0.5 kg	h = 400 mm	2
08	M = 1.7 kg	h = 295 mm	5
09	M = 5 kg	h = 200 mm	10
10	M = 5 kg	h = 400 mm	20
	M = 10 kg	h = 500 mm	50

* = no protection

Explanation

The standard NBN C20-001/A was valid until April, 1997. The tables mentioned above are classified according to the impact energy. The IPxx-X3 values and the IK-values can not just be compared to each other, because there exists a difference between the form of the hammer and the number of tryouts. In that case, it is impossible to set up a conversion table. Notice that no value was defined to replace the IPxx-11. If a shock resistance recommendation. The IK-value is shown with a figure of two numbers to exclude the confusion with the IPxx-X3 value.

Mission Statement

RFE (Reg Farrell Engineering Limited) prides itself as a "Solution Provider" incorporating only high quality products. Our people are trained, qualified and well experienced engineers who are always willing to spend time with our customers to acquire a thorough understanding of their application. The result in all cases is a solution, which will meet technical as well as financial requirements of the customer. Our objectives are based on an on-going partnership with our customers.
